VOLUME 2

Greenfield Avenue

124th Street to I-894 • Milwaukee County

SPRING 2010

Public
Information
Meeting

Recap

Resurfacing with additional intersection and safety improvements are vital to WIS 59 (Greenfield Avenue) between I-894 and 124th Street, as one of the most traveled roadways in Milwaukee County. During the first in a series of public information meetings (PIMs), held on May 13, 2009, dozens of residents attended and provided valuable feedback on traffic flow, safety and improvements.

Prior to the first PIM, the Wisconsin Department of Transportation (WisDOT) distributed door hangers that outlined the project with contact information for area residents and businesses. At the PIM, attendees learned about the WIS 59 improvements being considered and provided valuable input on intersection access, traffic signal and median modifications, and parking, pedestrian, bicycle, and transit accommodations. Written feedback also was provided to the project team through comment sheets.

Bicycle lanes are included in the proposed design. Additional pedestrian accommodations and median revisions are being considered based on input received at the first PIM. A safety analysis is in progress to identify safety improvement areas.

WisDOT has met with elected officials to gather input and to keep area residents and businesses informed.

This Greenfield Avenue project's success depends on active participation and input from stakeholders. Early identification of possible issues or concerns from property owners, residents, service providers and business owners in the vicinity of WIS 59 is important.

Please plan to attend our next public information meeting on March 16 at Madison Elementary School.

Wis 59 Project Overview

The Wis 59 (Greenfield Avenue) project in the City of West Allis includes reconstructing and resurfacing 1.5 miles of pavement between 124th Street and I-894 because the existing pavement is in poor condition. The section between 101st Street and 108th Street will be reconstructed. The section between 124th Street and 108th Street will be resurfaced.

Project benefits include:

- Improved roadway conditions
- Intersection safety
- Replacement of all sidewalk ramps within the resurface section that are in poor condition

The corridor is being evaluated for:

- Potential intersection improvements
- Median modifications
- Signal improvements

As part of the project design, the following are being investigated:

- Bicycle accommodations throughout the corridor
- Additional or improved sidewalk areas
- Crosswalk and sidewalk ramp location improvements at all signalized intersections and all intersections within the reconstruction section
- Replacement, addition or moving of some bus pads and shelters to fit existing transit system needs

WisDOT is in the preliminary design phase for the needed improvements. Preliminary design began in May of 2009. Design continues toward construction during April through November 2012. (See project sitemap below.)
