

# At - From Highway Required Warnings

Last Modified on 07/14/2017 10:53 am CDT

## TraCS Training Issue—Validation Warning

### Description:

There is a validation rule which checks the street fields for NB, SB, EB, or WB. This was added to TraCS because agencies only had those values in the street field causing issues downstream. The issue happens when the street name contains NB, SB, EB, or WB. TraCS will display a Warning.

Example: **WEB**STER ST. The word Webster has an EB in it causing TraCS to display a Warning. This is only a **Warning** and can be skipped after reviewing the street name.

Location			
Map <b>S WE</b>	DMV County <b>DANE - 13</b>	DMV Municipality <b>MADISON - 73, CITY</b>	
On Hwy Type	On Hwy #	On Hwy Dir	On Street Name <b>E WASHINGTON AVE</b>
Estimated Distance From Intersection			Direction From Intersection
From/At Hwy Type	<b>From/At Hwy #</b>	From/At Hwy Dir	From/At Street Name <b>N WEBSTER ST</b>
Structure Type			Structure Number

Validation:	0 Errors	1 Warnings
