

Configuration Wizard Changes in Fall 2018

Last Modified on 11/16/2018 3:35 pm CST

New fields were added to the Configuration Wizard form in the Fall of 2018.

The following fields have been added.

1. **Enable TLT Override**

- When checked the TLT override feature is available for use by the agency.
- TraCS Supervisors can always use the override feature even when unchecked.

2. **Auto TLT in Diagram**

- When checked the TLT map will auto populate the Crash diagram.

3. **File Link Mode**

- Copy is set by default. If using Web Services, Upload is used instead of Copy. File Link Mode is used to define attachment file location settings.

4. **Attch Download Retention**

- Only used when Upload is used for the File Link Mode. The number of days attachments are downloaded through the attachment upload feature.

Settings
