

# TraCS FAQ—Driver Condition Zip File Named Incorrectly

When transmitting a Driver Condition report to DOT the .zip file says “VehicleKilledWildAnimalPermit.zip” instead of V10DriverCondition.zip. To fix it follow the steps below. After fixing no distribution is required.

1. Sign into TraCS Configuration Manager as a TraCS Admin user
2. Click the Communication icon

3. Expand Communication Instructions
4. Expand TransComm
5. Click on driverconditionToWisDOT
6. Click on the Combined Options tab

Instruction Information

Name:   Active

Communication Type:   Form Based

File Zip Settings

Zip Individually  File Name  Unzip Individually

Zip Together  File Name  Unzip All

7. Click the File Name button
8. In the Value field changed it to say V10DriverCondition

Value:

9. Click OK
10. Click Ok
11. Close TraCS Configuration Manager
