

# Machine ID Conflict

Last Modified on 06/20/2017 1:49 pm CDT

If a computer has an error stating “Machine ID Conflict”, this means the TraCS machine number isn’t the same as the one saved in AutoNumber.ini file.

1. How to determine what your machine number is?
  - a. Sign into TraCS Configuration Manager as 00001
  - b. Click the Settings button

- c. Expand MachineID.ini and navigate down to MachineID.
    - d. Highlight MachineID  MachineID.Ini and on the right side you will see the MachineID.
    - e. Click Ok

2. Update the AutoNumber.ini file to reflect the correct Machine ID.
3. Click the Settings button

4. Expand AutoNumber.ini 
5. The following forms will have to be reviewed for correctness. Step 6 explains how to review and correct them.
  - a. Alcohol
  - b. Arrest

- c. Case Summary
  - d. Citizen Contact
  - e. Contact Summary
  - f. CrashV3
  - g. DeerTag
  - h. DNR
    - i. Driver Condition
    - j. Equipment
    - k. Fatal
    - l. Influence
  - m. Inspection
  - n. NTC
  - o. Task
  - p. ELCI Number Inventory Control
  - q. Warning
6. Expand DNR and highlight LastNumberUsed.
  7. On the right side under LastNumberUsed will be a long number.  
012050503000001 . The 7th ,8th and 9th characters is the machine number. The example shows 503. This number should be the same as the one from step 1 above.
  8. Once all the forms from step 5 have been reviewed/updated click the OK button to save the information. Open TraCS and test every form to ensure they all open.
