Subject: IH 94 Cranberry Interchange Design-Build Project  
Project ID 1023-02-81  
Request for Letters of Interest

The Wisconsin Department of Transportation (WisDOT) is developing a reconstruction project at the IH 90 / IH 94 system interchange (Cranberry Interchange) in Tomah, Monroe County. This project will replace existing bridges B-41-0024 (IH 94 EB over RAMP IH 90EB-IH94WB) and B-41-0044 (IH 94 EB over IH 90 WB) while keeping the existing roadways open to traffic. It is expected that replacement of these bridges will shift the existing IH 94 eastbound alignment north or south. WisDOT plans to deliver the project using the design-build delivery method and procure the project using a low bid design-build procurement. More information about this project can be found on the design-build website under the design-build projects page.

<https://wisconsindot.gov/design-build>

WisDOT is requesting Letters of Interest (LOI) from firms interested in providing services on this design-build project. Firms submitting an LOI will receive project notices and announcements as they become available, including notification of Request for Qualifications upon release. The LOI must include the name, phone number, and e-mail address of the firm's representative that is to be notified regarding project information. Please send your LOI to WisDOT's design-build submittals mailbox at [DOTDesignBuildSubmittals@dot.wi.gov](mailto:DOTDesignBuildSubmittals@dot.wi.gov).

In addition to submitting an LOI, interested firms may ask questions regarding the project. Firms are advised that WisDOT may publish questions received and responses to its website. Firms should not include proprietary or confidential information as part of an inquiry. WisDOT will redact the names of firms when publishing any responses. Please provide inquiries by September 27, 2024. While **submission of an LOI is not required** to participate in the upcoming procurement, interested firms are strongly encouraged to submit an LOI and project inquires.

Thank you for your interest in this project and support in making WisDOT's design-build program a success.

Sincerely,

*Benjamin P. Thompson*
