### General Notes:

Immediately report any manufacturer's modification to approved product to the Department's contact person listed above. Failure to report changes can cause hardware to be removed from Approved Product List.

The minimum amount of information the Department requires for review is: crash test videos, crash test reports, eligibility/approval letters, installation manuals, maintenance manuals, itemized repair cost ( including labor time and material cost) for the various crash tests performed.

The Department reserves the right to request additional information at anytime.

Providing documentation to the Department for review does not automatically grant approval of product.
