* As this list of sites is reviewed periodically it might be determined that a given facility does not meet the F4R qualifying conditions (e.g., the distance between the two damage locations is too large, or the damage was due to factors other than the severe weather event). Such facilities are removed from the list and corresponding map.

** As severe weather events resulting in emergency declarations occur, catastrophic damage locations will be reviewed to determine if warrant F4R Facility designation (a second instance of catastrophic damage in the same location); if they do, they will be added to this list and corresponding map.

† Map numbers are for identification purposes; they are not counts and they are not sequential or continuous
