

Highway Maintenance Manual

Bureau of Highway Maintenance

Chapter 02 Administration

September 2022

Section 05 Authority

Subject 10 Standard Specifications for Highway and Structure Construction

1.0 General Policy

The State of Wisconsin Department of Transportation, Standard Specifications for Highway and Structure Construction, 2023 Edition, referred to as the Standard Specifications, is an official document of the department. The following link is the Wisconsin Department of Transportation's website with the most recent version of the standard specifications: <https://wisconsindot.gov/pages/doing-bus/eng-consultants/cnstl-rsrces/rdwy/stnds-spec.aspx>

The Highway Maintenance Manual sections and subjects concerning construction and materials are advisory and do not supersede WisDOT's Standard Specifications.

2.0 Maintenance Policy

The department recognizes the mission of maintenance is to maintain highway and other transportation facilities as constructed. Exceptions to the current edition of the Standard Specifications may be appropriate. Exceptions, documented in writing, may be authorized by the State Maintenance Engineer for Highways in cooperation with interested parties and/or regional staff depending on the specific circumstances or nature of the repair.
