

Preferred Alternative

Restricted Crossing U-Turn (Direct Access from US 41)

Intersection Statistics

Conflict Points – 24
Reduces crashes by 48%
Reduces injury crashes by 63%

Benefits:

- Reduces crash potential – particularly far side right angle crashes
- Simplifies driving task – only required to look at one direction of traffic at a time
- Easily retrofitted to existing intersection
- Low-cost alternative

Kamm Road to US 41 NB =
~35 seconds (+20 seconds)

Kasal Lane to US 41 SB =
~35 seconds (+15 seconds)
