HYBRID ALTERNATIVE 2

MASON STREET AS ELEVATED ROADWAY | BROADWAY TO THE FOX RIVER

REPLACE BASCULE AT LOWER ELEVATION

Grade separation at Broadway to remain due to proximity of railroad. Additional access added at Chestnut and an extension of 3rd Street. Full level of access at Chestnut to be studied later.

At grade connection to Fox River Trail

Full replacement of Don A. Tillemann Memorial Bridge. To be reconstructed to maximize the area at grade while still maintaining a grade separation over the railroad and Broadway.

Streets to change from One Way to Two Way

No direct access to Playground from Howe Elementary School.
