Rehabilitation Project Information Presentation

**Fall 2024**

# Project Team

- David Koepp, PE – WisDOT Project Supervisor
- Nicholas Spitzer, PE – WisDOT Consultant Project Manager
- Kevin Meyer, PE – Consultant Project Design Leader

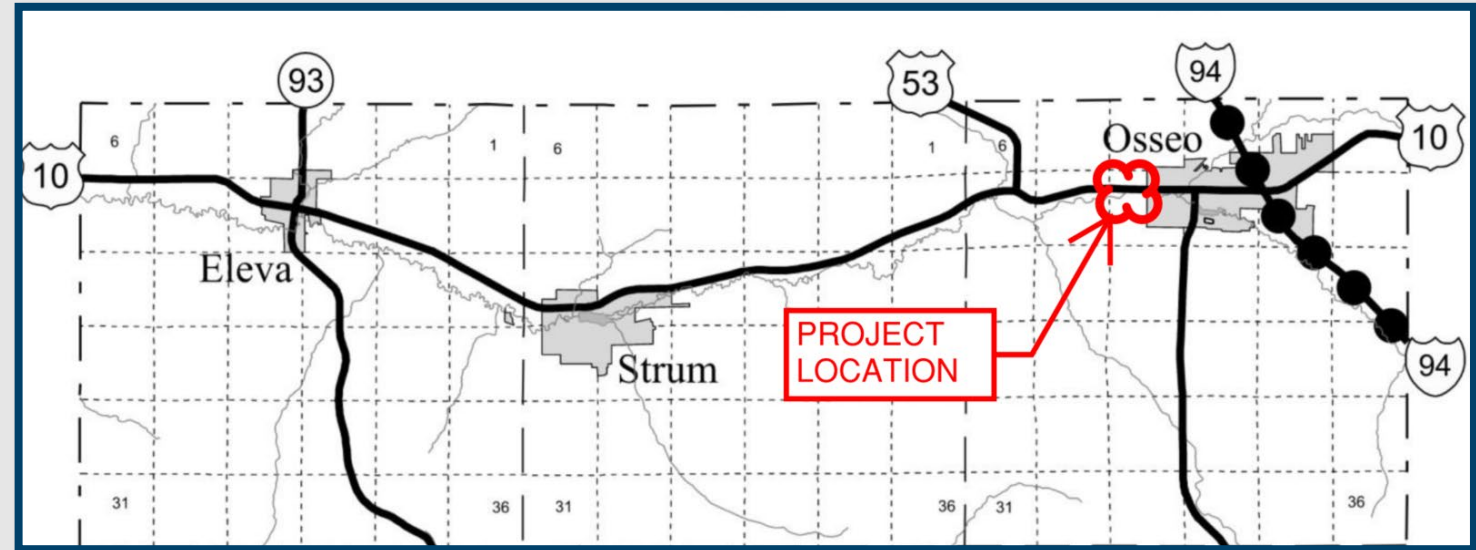

# Agenda

- Project Location
- Project Needs
- Proposed Improvements
- Traffic Impacts
- Schedule
- Contact Information
- Public Comments

# Project Location

- Structure B-61-0283
  - Buffalo River Bridge
  - US 10 west of Osseo in Trempealeau County

# Project Needs

- Purpose
  - Address structural deficiencies on the existing bridge
- Specific issues with existing structure include:
  - Concrete deck is worn and cracked.
  - Steel girders are corroded.
  - Wing walls are cracked and spalled.

# Proposed Improvements

- Proposed work consists of:
  - Replacing existing bridge deck
  - Replacing bridge deck railing with concrete parapet
  - Making concrete surface repairs
  - Painting girder ends
  - Adding concrete pavement approach slabs
  - Replacing guardrail

# Traffic Impacts

- Staged construction
  - US 10 will remain open during construction
  - Roadway will be reduced to a signal lane utilizing temporary traffic signals.
  - New bridge deck will be constructed half at a time.

# Project Schedule

2024

- Preliminary design

2025-2027

- Design refinement

2028

- Construction
