

DETAILED ALTERNATIVES

Bicycle Facility Types

Separated Bike Lane

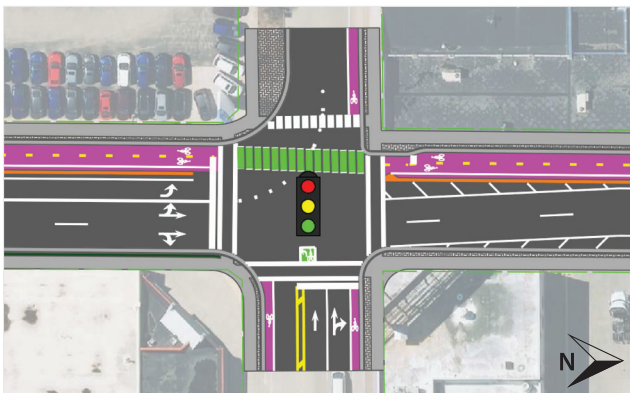

Parking-Separated Bike Lane

Sidewalk-Level Bike Lane

Separated Cycle Track

Bike Signals

At some signalized intersections, bicycle movements are in conflict with all other vehicle movements. In this example (Alternative 2, 4th Street and Cass Street intersection), northbound US 53 traffic and westbound Cass Street traffic would conflict with the bicycle crossing. A bike signal will be provided that adds a separate green phase for bikes to traverse the intersection.
