

## PRELIMINARY ALTERNATIVES

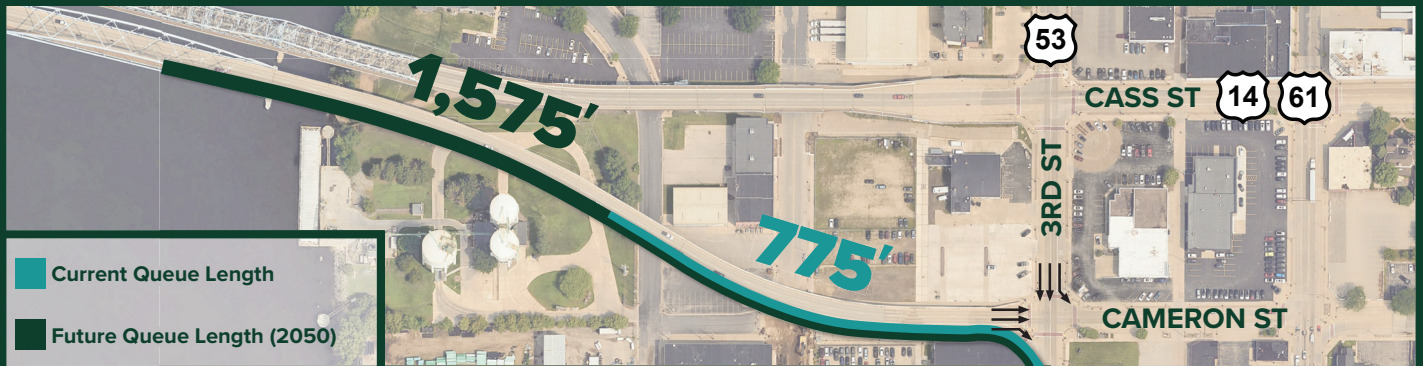

### Spot Improvement Concepts:

### 3rd St & Cameron St Intersection Improvements

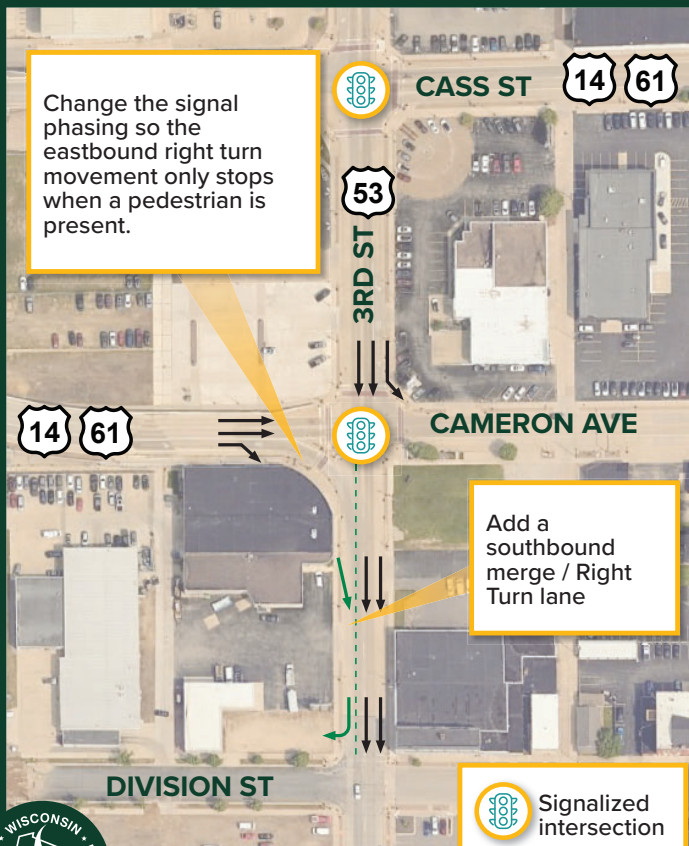

## 3rd St & Cameron St Intersection Improvements

The 3rd St & Cameron St intersection has safety and operations concerns related to lengthy queues in the eastbound right turn lane. These queues frequently spill out of the turn lane and block the through lane of traffic. Several rear-end crashes involving these right turners have occurred in recent years. Two options are being considered to address this concern:

## Current and Future Queue Length in Eastbound Right Lane

## Option 1: Free-flow Right Turn

## Option 2: Dual Right Turn Lane
