

PRELIMINARY ALTERNATIVES

WIS 16 & WIS 157 Intersection

EXISTING INTERSECTION ISSUES

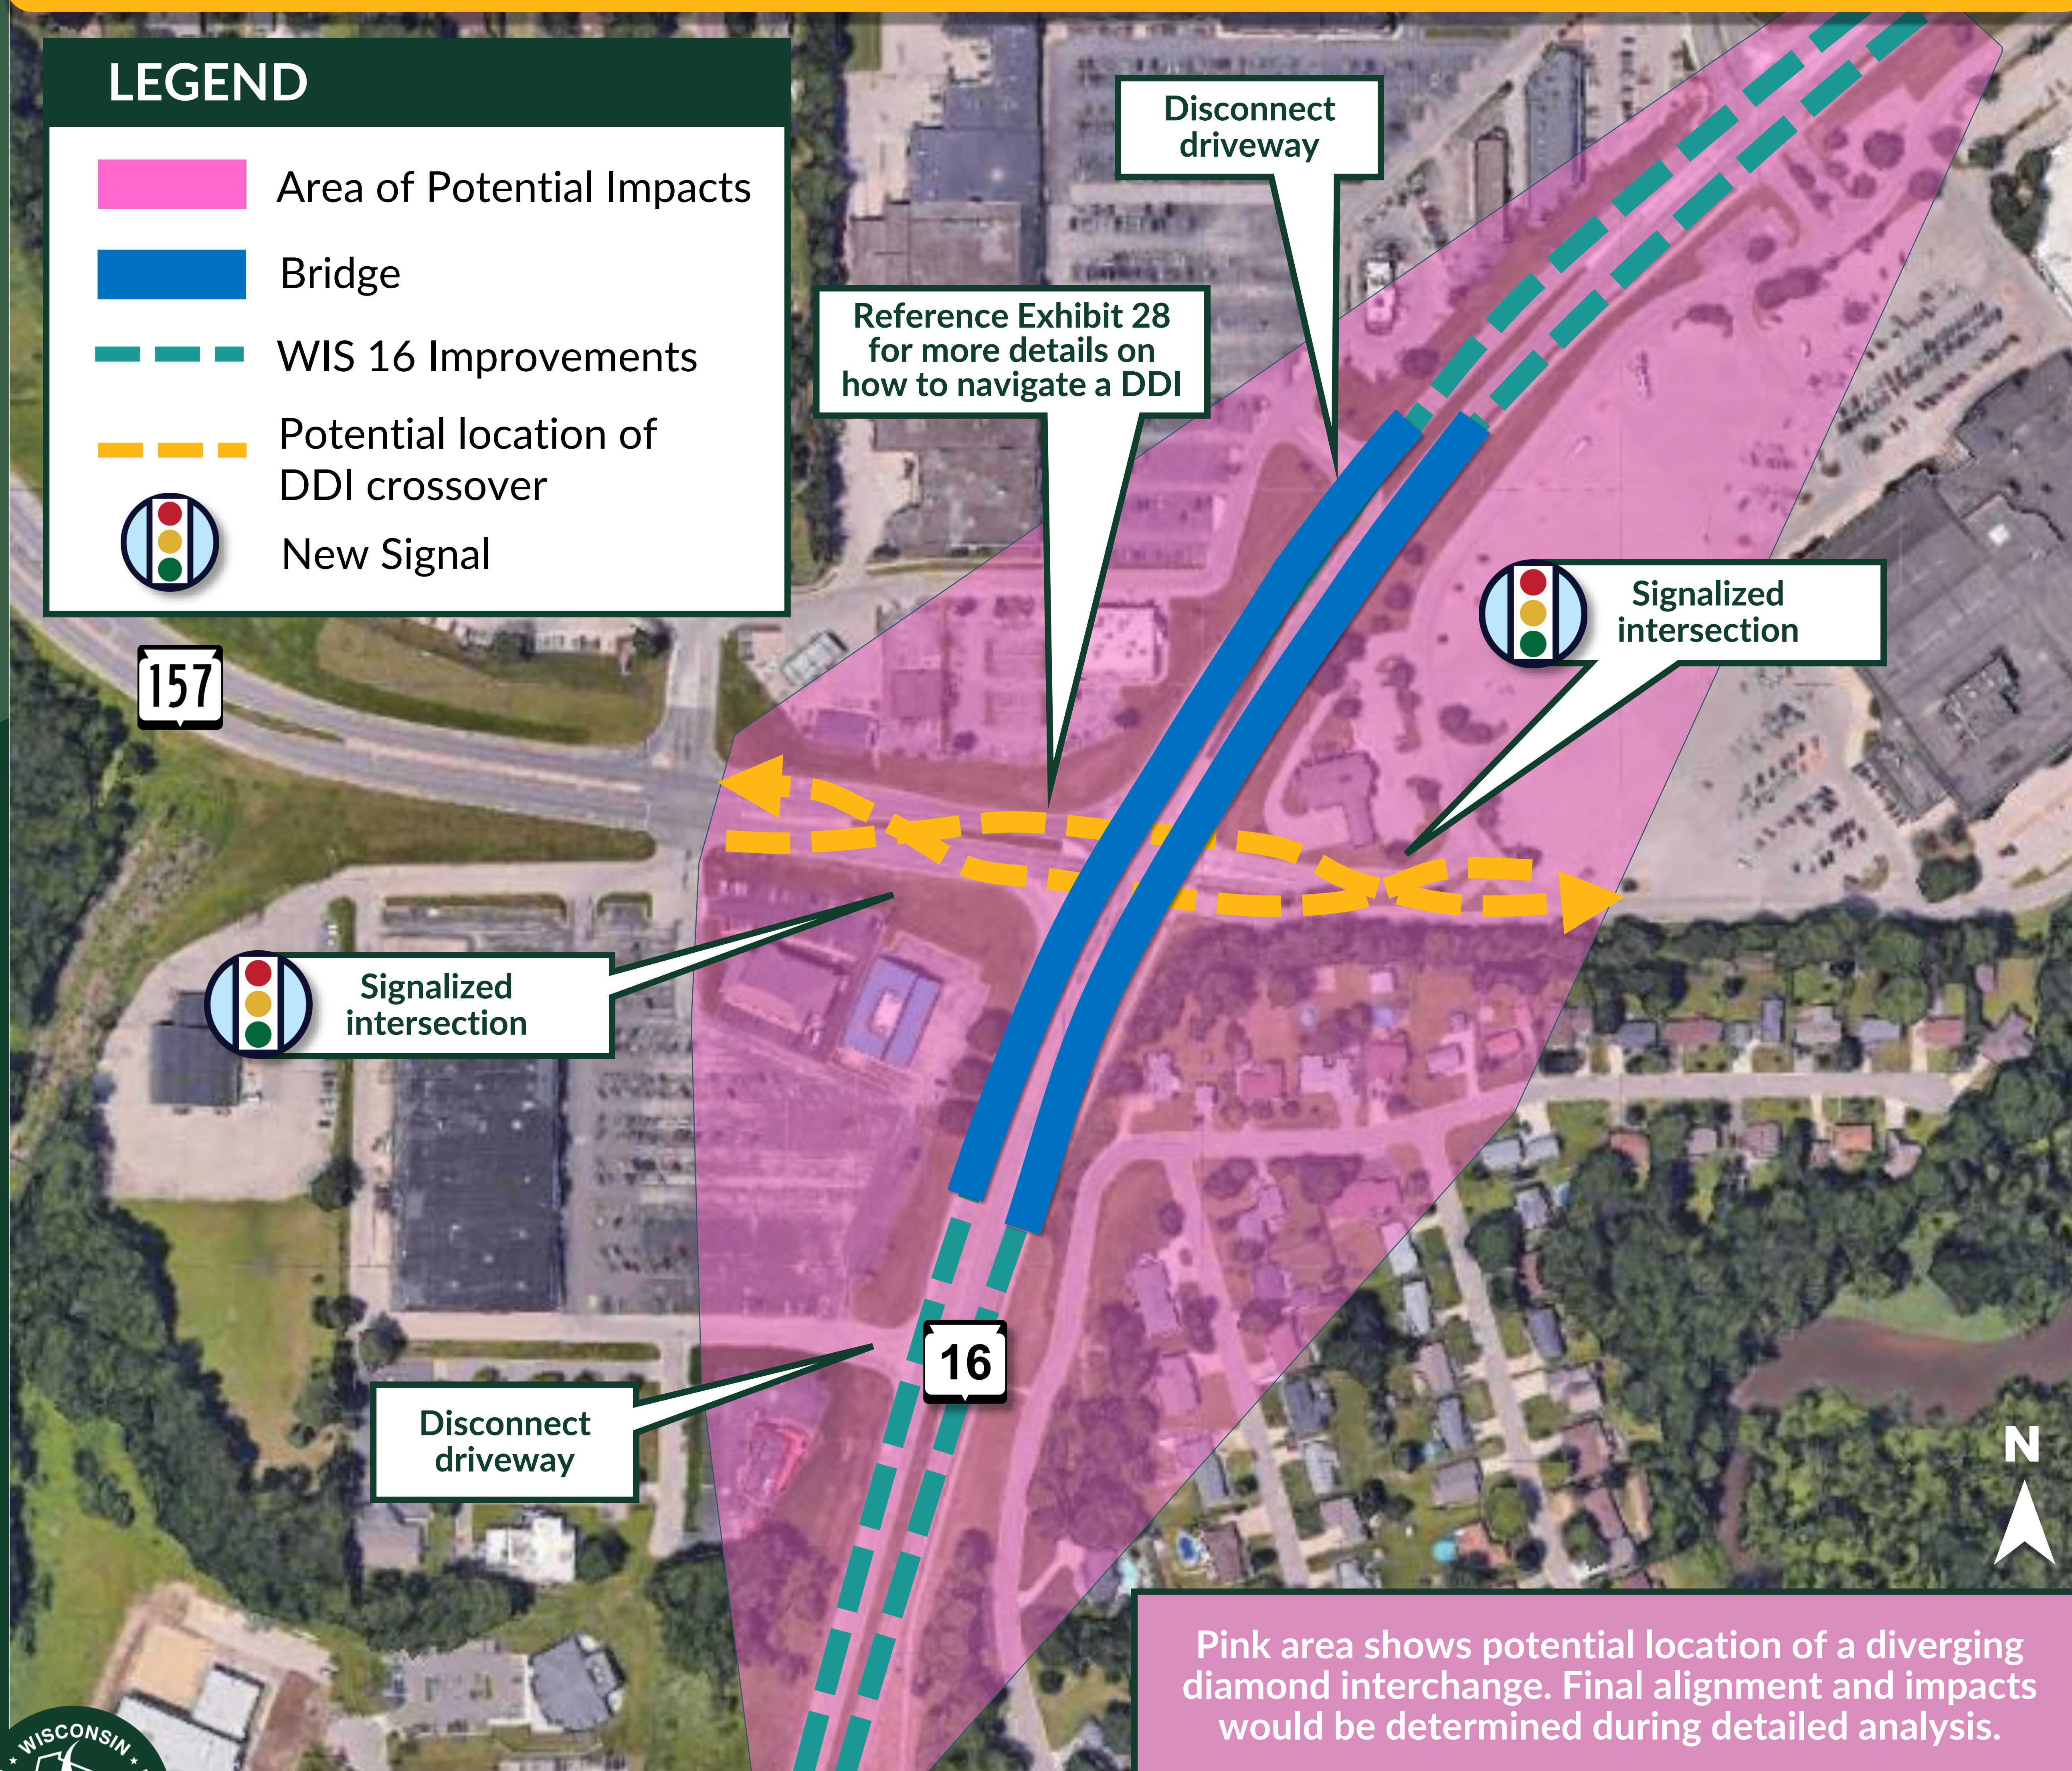

- The WIS 157 intersection has the second most intersection crashes along the study corridor
- The WIS 157 intersection is a high stress bicycle/pedestrian crossing
- The WIS 157 intersection has congestion today that is expected to worsen in the future
- Eastbound WIS 16 left turn traffic backs up and blocks the WIS 16 through lane
- Westbound WIS 16 through traffic backs up and blocks the WIS 16 right turn lane

Option 3 of 3: Diverging Diamond Interchange (DDI)

Special type of interchange that better accommodates high volumes of left turning vehicles

LEGEND

- Area of Potential Impacts
- Bridge
- WIS 16 Improvements
- Potential location of DDI crossover
- New Signal

Pink area shows potential location of a diverging diamond interchange. Final alignment and impacts would be determined during detailed analysis.
