

## US 51: I-39/90 to Spring Road

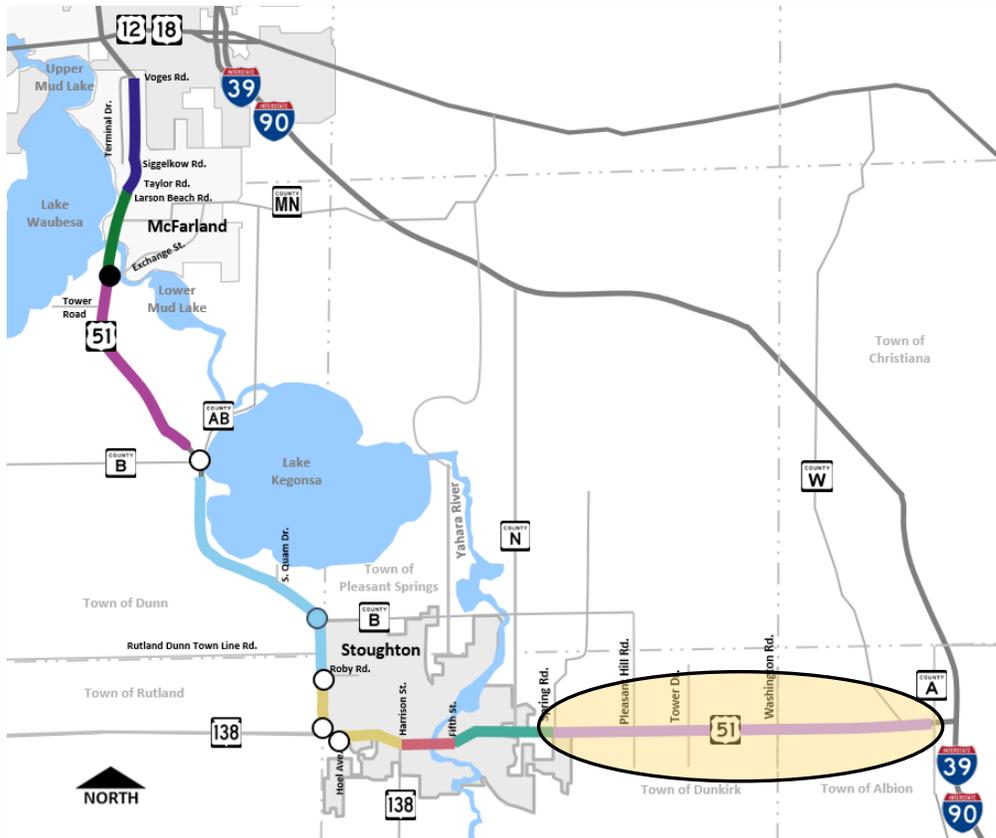

Welcome to the public involvement meeting for the proposed improvements to US 51 between I-39/90 to Spring Road. See Figure below for the project location in respect to the larger US 51 corridor.

The Wisconsin Department of Transportation (WisDOT) is currently in the design phase of these projects. The objective of this meeting is to provide you with updated information regarding the proposed improvements. After a brief presentation, the meeting will follow an open house format.

The purpose of these projects is to provide a safe and efficient transportation system in the US 51 corridor to serve present and long-term travel demand while minimizing disturbance to the environment. This will be obtained by working to address existing safety conditions, accommodating travel demand, addressing existing pavement conditions, improving bicycle and pedestrian accommodations, and considering corridor preservation and long-term planning measures.

Improvements include, but are not limited to:

- Reconstruction of the 2-lane rural roadway
- Adding right turn lanes at numerous intersections
- Adding an EB passing lane between Washington Road and Tower Drive
- Adding a bypass lane at Ramsey Road
- Bike lanes through intersections and a paved shoulder
