Dear Traffic Safety Advocate:

The Department of Transportation's Bureau of Transportation Safety is happy to provide to you a copy of the "2011 Wisconsin Motorcycle Safety Facts Book."

This publication includes a wealth of motorcycle crash data and general motorcycling information, which assists our department in developing future highway safety programs. It also supports our goal of improved information sharing among those groups and individuals having an interest in motorcycle safety. We face many challenges, and the commitment to reduce crashes, deaths and injuries continues to be one of WisDOT's top priorities. I extend my thanks to the principal researcher of this document, Donald Lyden III.

To obtain further program information or additional copies of this book, please write Gregory Patzer, WisDOT Bureau of Transportation Safety, P.O. Box 7936, Madison, Wisconsin 53707. Phone: (608) 266-7855. FAX: (608) 267-0441.

2011 MOTORCYCLE SAFETY AT A GLANCE

- In 2011, there were 5.9 registered motorcycles for every 100 Wisconsin residents. In 10 years, the number of residents holding a Class M endorsement (motorcycle license) has increased by 25% from 404,732 in 2002 to 506,810 in 2011.
- In 2011, 80 motorcyclists, including passengers, were killed in traffic crashes compared to 98 in 2010, a 18% decrease. This figure is also 14% higher than the 70 fatalities that occurred in 2001.
- 2,100 motorcyclists were injured on Wisconsin roads in 2011. That represents a 5.1% decrease from the 2,214 injured in 2010 and a 3.1% increase from 2001. An additional 95 non-motorcyclists were injured in crashes involving motorcycles in 2011.
- While cyclists between ages 35 and 54 account for 49.6% of licensed motorcyclists, they accounted for 41.1% of motorcyclists in crashes in 2011. 16-24 year olds account for only 4.0% of the licensed motorcyclists, but account for 16.6% of those in crashes in 2011.
- Since 1996, cyclists in the 45 and older age group experienced the largest increase in the number of fatalities of any age group. In 2011, 45 cyclists in this group were killed compared to eleven in 1996. This represents a four-fold increase.
- Alcohol and/or speed were the primary contributing factors in 65% of fatal single unit motorcycle crashes in 2011 and in 29% of all single unit crashes.
- There were 180 alcohol-related motorcycle crashes in 2011. Of these, 152 or 84.4% occurred between 4 p.m. and 4 a.m.
- In 2011, only 8.0% of passenger car/deer crashes and 6.0% of utility truck/deer crashes resulted in death or injury to a motor vehicle occupant. 68.8% of motorcycle/deer crashes resulted in death or injury to a motorcyclist.
- Motorcycle helmets were known to have been worn by 5 (6%) of the 80 motorcyclists killed in traffic crashes in 2011.
- Motorcycle helmets were known to have been worn by 40% of all motorcyclists involved in crashes in 2011.
- Nine out of 10 motorcycle crashes occurred on dry pavement in 2011.
- Approximately eight out of 10 Wisconsin residents who hold regular motorcycle endorsements are male.
- Saturday and Sunday are the two most common days for alcohol-related and non-alcohol-related motorcycle crashes. More than half of the alcohol related crashes occurred on these two days.
- More motorcycle crashes occur between 1 p.m. and 7 p.m. than any other six-hour time period.
- In general, more fatalities occur in the more densely populated southeast area of the state than in any other region in Wisconsin.
- The five most frequent possible contributing circumstances in both fatal and non-fatal motorcycle crashes in 2011 were: 1) Failure to control, 2) Speed too fast/conditions, 3) Inattentive driving, 4) Driver condition, 5) Exceeding speed limit.

In this table, *Total Persons Killed* and *Total Persons Injured* include everyone killed or injured in crashes involving motorcycles, not just motorcyclists.

Rural = an unincorporated area or an incorporated area with a population under 5,000.

Urban = an incorporated area with a population of 5,000 or more.

2007-2011 Fatal Motorcycle Crashes/Motorcyclists Killed by County

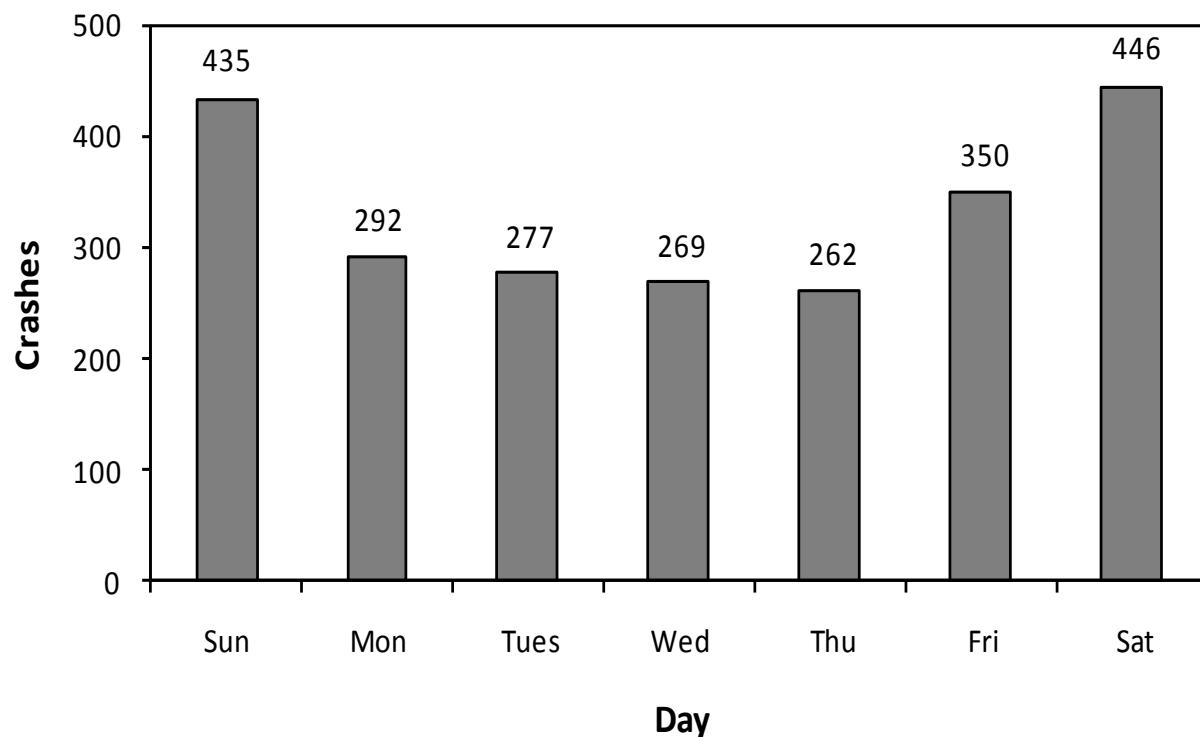

Note: Numbers represent five-year totals of fatal motorcycle crashes/motorcyclists killed. Fatal crash numbers may also include crashes involving non-motorcyclists.

Single Unit Motorcycle Crashes Primary Driver Contributing Factors

Fatal Crashes

Total Crashes

This report counts Primary Driver Possible Contributing Circumstances (PCCs) marked on the accident report form as well as citations issued by law enforcement officers. It only counts one of the PCCs or citations per crash and counts some PCCs before others. Therefore, for example, the portion of primary PCCs noted as inattentive represents only PCCs for inattention that were the sole PCC given. The numbers for this report were calculated differently than in years prior to 2001 and may not directly compare.

Moped Registration Data as of 12/31.

Note: Statistics on mopeds are kept separate from motorcycle statistics due to technological differences as well as to make valid, statistical comparisons to previous years. This varies from what is reported under the Fatality Analysis Reporting System (FARS). FARS includes mopeds as "motorcycles".

BASIC RiderCourse

For many people, motorcycling is a fun and energy-efficient means of transportation or recreation. However, motorcycling requires skill, concentration, and reasonable precautions. Although it is possible to learn to ride a cycle on your own, trial and error is a tough teacher of motorcycling skills. That's why virtually all motorcycling groups have endorsed the Motorcycle Safety Foundation's Basic RiderCourse (BRC) for beginning riders as well as all other levels of motorcycle rider education.

The BRC is designed for beginning riders. It was developed by the Motorcycle Safety Foundation and approved by the Wisconsin Department of Transportation. It consists of six hours of classroom and 10 hours of on-cycle instruction including the following: preparing to ride; turning, shifting, and braking; street strategies; special situations; increasing riding skills; and maintenance and insurance.

RiderCoaches (instructors) for the course are all certified by the Motorcycle Safety Foundation and approved by the Wisconsin Department of Transportation. All are motorcycle riders and have completed 72-plus hours of RiderCoach training.
