

2011 WISCONSIN TRAFFIC CRASH FACTS

Prepared by the
Wisconsin Department
of Transportation

2011 Facts and Figures

- 565 persons were killed in Wisconsin motor vehicle traffic crashes. This is an average of just over one life lost each day on Wisconsin traffic arteries.
- 40,144 persons were injured in 28,965 reported injury crashes and 515 fatal crashes. 3,534, or 9%, of those injured were known at the time of the crash to have sustained incapacitating injuries.
- Of the 565 persons killed, 12% (57 pedestrians and 12 bicyclists) were not drivers or passengers of motor vehicles. Fourteen percent (80) were motorcycle drivers or motorcycle passengers.
- Of the 565 persons killed, 40% died in alcohol-related crashes, 29% died in speed-related crashes and 16% died in crashes that involved both speed and alcohol.
- Of the 371 drivers who were killed and tested for alcohol concentration, 130 drivers (35%) had an alcohol concentration of .08 or above.
- 52% of persons killed in passenger car and light truck crashes (for instances in which safety belt use could be determined) were not using safety restraints.
- 88% of all motorcyclists killed in crashes (for instances in which helmet use could be determined) were not wearing helmets.
- Fifty-five percent of all crashes occurred off the state highway and Interstate systems, on county trunk and local roads. City police and county sheriffs responded to 96,829 (86%) of these crashes.
- The total number of registered vehicles was 5,526,798, a 0.8% increase over 2010.
- The total number of licensed drivers was 4,142,823 a .7% increase over 2010.
- The fatality rate per 100-million miles of travel was 0.96.

Crashes, Not Accidents

Traffic crashes are not accidents, but avoidable events caused by a single variable or chain of variables. Dedicated to reducing traffic injuries and fatalities by addressing the factors that cause them, the bureau of transportation Safety coordinates a statewide behavioral highway safety program.

March 2013

Dear Traffic Safety Advocates:

The Wisconsin Department of Transportation is pleased to provide you with a copy of the 2011 edition of the Wisconsin Traffic Crash Facts book. This book serves as a resource for traffic safety professionals and those interested in making Wisconsin's roadways, sidewalks, and bicycle paths safe for all of us who travel them.

This book contains statewide information about traffic crashes and their human consequences. The statewide counts are parsed out in several levels of detail including: types of crashes, the county or municipality location of crashes, types of vehicles in crashes, severity of injuries, and age and gender of drivers. I extend my thanks to the principal researcher of this project, Donald Lyden.

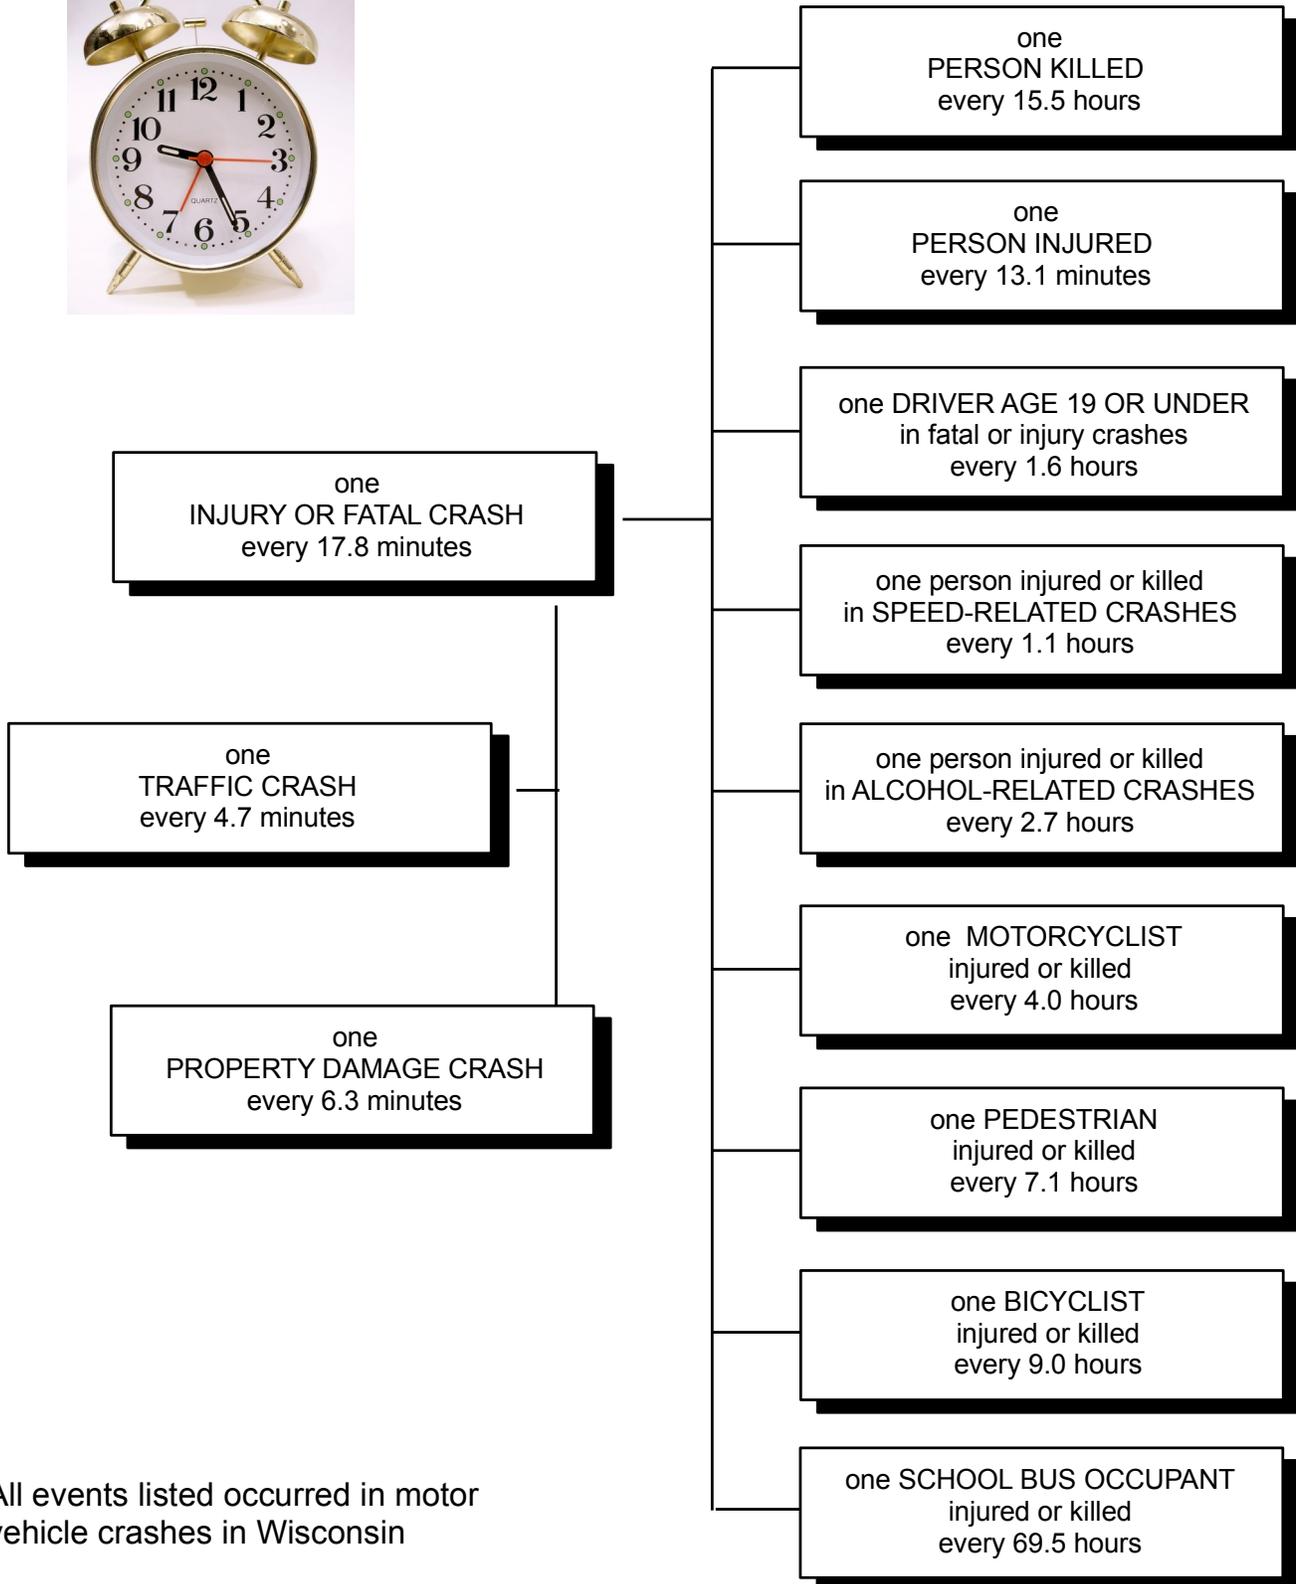

To view this publication online, visit <http://www.dot.wisconsin.gov/safety/motorist/crashfacts/index.htm>. To obtain additional copies of the Crash Facts Book or more information about transportation safety in Wisconsin, please contact us.

Sincerely,

A handwritten signature in black ink that reads "Sandra K. Huxtable".

Recent Changes in Crash Reporting Threshold

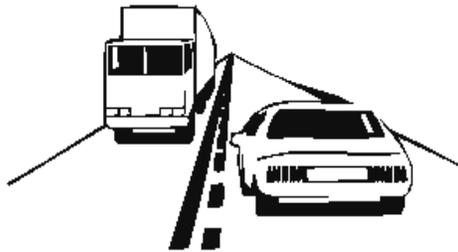

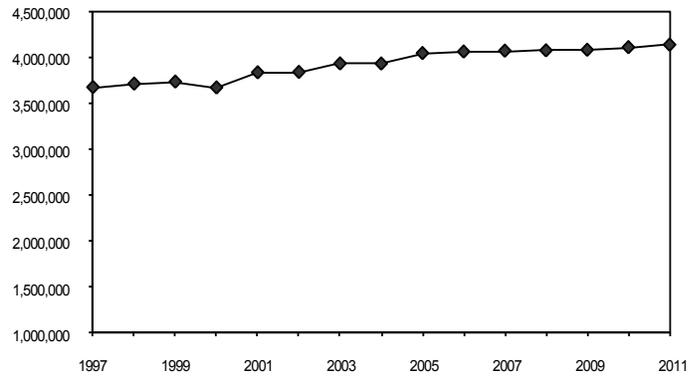

- December 20, 1979** Property damage threshold increased from \$200 to \$400 combined damage. \$200 threshold for government-owned property.
- July 31, 1981** Property damage threshold \$500 to "any one person's property." \$200 threshold for government-owned property.
- April 19, 1988** Property damage threshold \$500 to "any one person's property." Government-owned property changed to \$500 for government-owned vehicles, and \$200 for all other government-owned property.
- January 1, 1996** Property damage threshold changed to \$1,000 to "any one person's property." Government-owned property changed to \$1,000 for government-owned vehicles, and remained at \$200 for all other government-owned property.

The "reporting threshold" is the minimum set of criteria that must be met before a crash is considered to be reportable. The above represent changes to the reporting threshold over recent years. See the Glossary at the end of the book for a full definition of a "reportable crash".

Average crash response time is the difference between time notified and time of arrival as reported by the investigating officer. Times are shown in minutes. About 10% of the crashes that happen are excluded from this analysis due to missing time values on the MV4000. The enforcement agency type *County Traffic* was previously included in the *Other* column, but there is now no enforcement agency of that type. This year, the enforcement agency type *Other* includes the *Department of Natural Resources*, *University of Wisconsin system campus police*, the *State Fair Park police*, *Capitol Police*, and several police departments that serve Indian tribes.

This report is from the crash database and from the citation file and represents only the citations for the year 2011 that have been adjudicated as of the end of June, 2012. It does not consider the outcome of the adjudication. *Hazardous* citations are those issued in circumstances where the driver or vehicle condition has increased the risk of a crash. *Other hazardous* citations include offenses such as *failure to yield right of way* and *inattentive driving*. *Nonhazardous* citations include offenses such as *no or expired registration* and *no license plates*. An OWI arrest often results in two citations being issued (one for *operating under the influence* of an intoxicant and one for having a *prohibited alcohol concentration*). Mostly, this table counts only one OWI citation per arrest. Juvenile and commercial OWIs are excluded. Select other traffic violations are also excluded.

A traffic control should be reported for each unit in a crash; multiple traffic controls are noted in multiple unit crashes. The controls can be the same for each unit or different. If they are the same, both are listed. Less than one control would be noted if the officer didn't record a traffic control. For example, controls are not required to be noted for single unit, property damage deer crashes.

This report counts Primary Driver Possible Contributing Circumstances (PCCs) marked on the accident report form as well as citations issued by law enforcement officers. It does not address contributing factors on the part of pedestrians. It only counts one of the PCCs or citations per crash and counts some PCCs before others. Therefore, for example, the portion of primary PCCs noted as inattentive represents only PCCs for inattention that were the sole PCC given. The numbers for this report were calculated differently than in prior years and may not directly compare.

2010 Safety Responsibility (SR) Program Results*

Wisconsin does not require proof of automobile insurance for driver licensure or for vehicle registration. State governments have found that such laws may not reduce the number of uninsured motorists, because policies are easily cancelled after leaving the motor vehicle office. Verifying continued insurance coverage has proven difficult and costly to enforce. However, a minimum amount of liability insurance is required to operate a motor vehicle.

Since 1946, Wisconsin has required all motorists involved in reportable crashes (see page 2 of this book) to submit evidence to the Division of Motor Vehicles of their financial ability to pay for damages they caused. Failure to prove financial ability results in suspension of operating and registration privileges.

During the most recent year for which Safety Responsibility Program results are available, 2010, there were 6,486 claims (verifications of damages or injuries filed against an uninsured negligent driver and/or vehicle owner) made against 8,716 uninsured drivers and/or owners exceeding \$32 million in damages. These claim amounts include estimated court costs. In approximately 32% of the crashes, the driver and the owner were different persons.

2,769 (32%) responded to the notice of suspension by settling the claims prior to suspension, 244 posted the required security deposit, 5,947 drivers and owners failed to comply with the requirements spelled out on the Notice of Suspension, which resulted in the suspension of their operating and registration privileges. 1,887 suspended motorists complied with the Safety Responsibility requirements after the Suspension Orders were entered. 3,223 motorists accepted the one year suspension of privileges. As of January, 2011, 837 of the motorists are still withdrawn.

Approximately 1.1% of the drivers or owners of the 206,048 vehicles involved in reportable crashes during 2010 were uninsured, failed to pay for the damages and accepted a one year suspension of privileges. This rate compares favorably to other states.

This report counts all units in reportable crashes (see page 2 of this book) except pedestrians. These numbers do not represent crashes. Because only units that have collided with a motor vehicle on a public roadway are included, this report does not accurately reflect the volume of bicycle, all-terrain vehicle, or snowmobile crashes in Wisconsin or even on Wisconsin public roads. A *fire fighter on emergency* is a fire fighter or emergency medical technician / first responder (paid or volunteer) who is responding to an emergency summons using a vehicle not owned by a fire fighting or emergency agency.

The numbers in this table represent the number of times a given vehicle PCC was cited as a possible contributing circumstance for a passenger vehicle (a passenger car or a light truck) in a crash. The numbers do not represent numbers of crashes or represent driver. Of the 93,277 crashes involving at least one passenger vehicle, 3,515 (4%) had vehicle PCCs cited for a passenger vehicle in the crash. Of the 447 fatal crashes, 21 (5%) had passenger vehicle PCCs cited. Of the 27,348 injury crashes, 1,004 (4%) had passenger vehicle PCCs noted.

Commercial Motor Vehicle Driver is a person who is operating a vehicle for which a Commercial Drivers License (CDL) is required. This report, however, does not inform us as to the drivers license status; it counts drivers of such vehicles involved in crashes. Commercial motor vehicles are those weighing 26,000 pounds or more, carrying hazardous materials requiring placarding, or designed to carry sixteen or more persons including the driver. The Total Drivers column includes some persons for whom gender was not reported on the crash report.

The numbers in this table represent the number of times a given driver PCC was cited as a possible contributing circumstance in a motorcycle crash. They do not represent numbers of crashes or drivers. Of the 2,330 crashes involving at least one motorcycle, 1,174 (50%) had driver PCCs cited for a motorcycle driver in the crash. Of the 79 fatal crashes, 49 (62%) had motorcycle driver PCCs cited. Of the 1,876 injury crashes, 996 (53%) had motorcycle driver PCCs cited.

Single Unit Motorcycle Crashes Primary Driver Contributing Factors

Fatal Crashes

Total Crashes

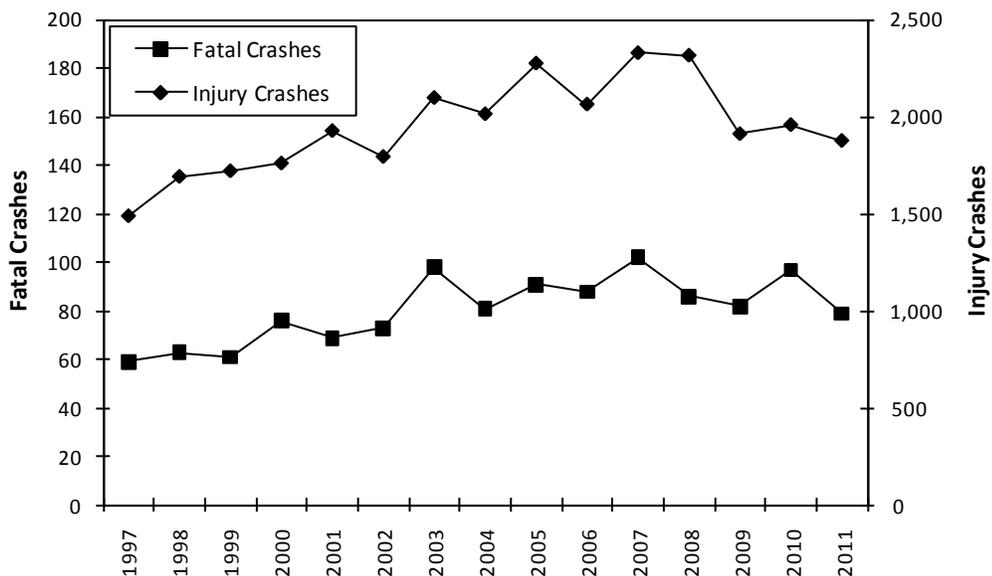

This report counts Primary Driver Possible Contributing Circumstances (PCCs) marked on the accident report form as well as citations issued by law enforcement officers. It only counts one of the PCCs or citations per crash and counts some PCCs before others. Therefore, for example, the portion of primary PCCs noted as inattentive represents only PCCs for inattention that were the sole PCC given. The numbers for this report were calculated differently than in years prior to 2001 and may not directly compare.

VI. SPEED- RELATED CRASHES

SPEED LIMIT

65

This section details the occurrence of speed-related crashes, including:

- Age of Driver
- County and Highway Class
- Severity of Crash

Speed-Related Crashes

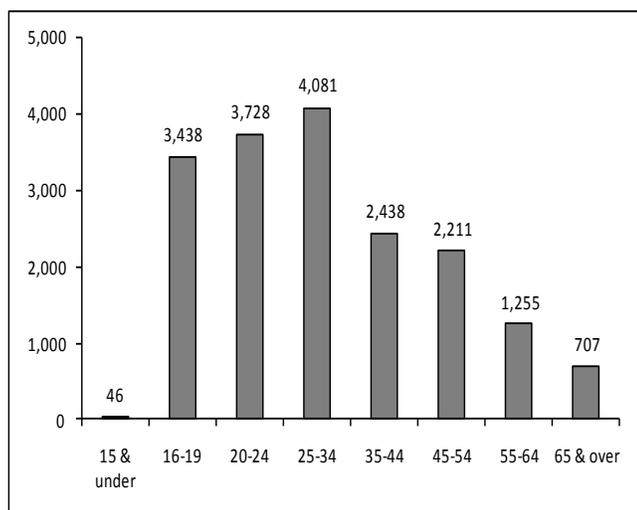

A *speed-related crash* is defined as a crash in which at least one driver involved in the crash received a citation for speeding or was listed on the accident report as *exceeding speed limit* or *speed to fast/condition*. In 2011, speed was listed as a contributing cause in 16.3% of all crashes and in 27.4% of all fatal crashes. Some crashes involved both speed and alcohol; those crashes are included in both the speed-related crash tables and the alcohol-related crash tables.

A crash is considered to be Speed-Related when at least one driver was listed on the crash report as exceeding speed limit or speed too fast/condition or received a citation for speeding.

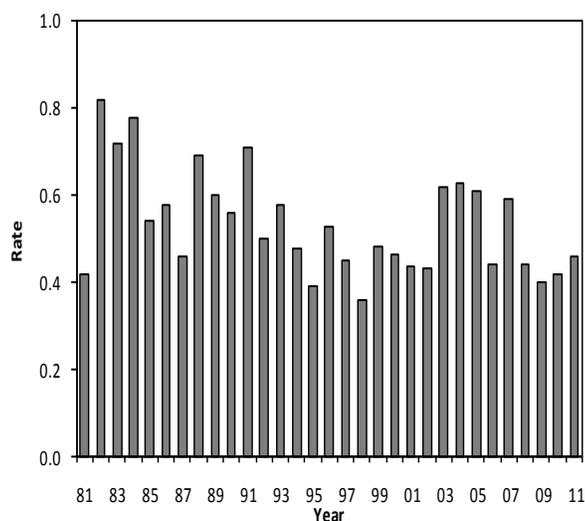

2011 Rural Interstate Summary

Wisconsin Continues to monitor crashes on the Rural Interstate System. This is in connection with legislation that became effective on June 17, 1987, authorizing 65 mile per hour speed limits on these portions of highway.

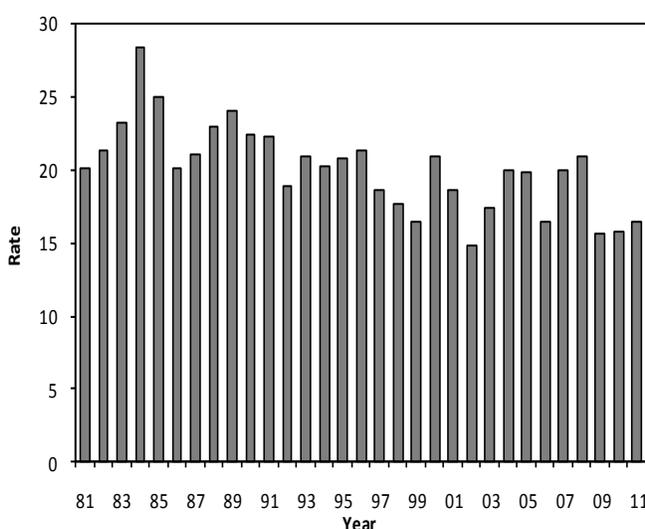

In 2011, the overall crash rate for the 478 miles of rural interstate was 79.58. The crash rate is the number of crashes per 100 million vehicle miles traveled. Overall, vehicle miles traveled on rural interstate highways increased by 0.1% in 2011. This is due in part to a uptick from a nation wide economic slowdown.

The charts below list the crash rates on rural interstate highways by crash severity.

ALCOHOL-RELATED FATALITY - A person who died within 30 days as a result of a traffic crash involving alcohol.

ALCOHOL CONCENTRATION (AC) TEST - A test to determine the level of alcohol in a person's bloodstream. In Wisconsin, the limit of .10 equals an alcohol level of 1 part per thousand.

COLLISION CRASH - A motor vehicle crash other than an overturning incident in which the first harmful event is a collision of a road vehicle in transport with another motor vehicle, other property, or pedestrians.

CRASH - An occurrence that originates or terminates on a traffic way, that involves at least one motor vehicle in transport and results in injury or death to any person, or damage to any property. This includes acts by the operators of motor vehicles that contribute to the cause of a crash regardless of physical contact and, for the purpose of ch. 344, WI Stats, (Safety Responsibility Program), includes intentional acts.

CRASH RATE - The number of crashes per 100 million vehicle miles traveled.

CRASH SEVERITY

Fatal Crash - A motor vehicle traffic crash in which one or more persons were killed.

Injury Crash - A motor vehicle traffic crash involving one or more persons who were physically harmed or who complained of physical harm but were not killed.

Property Damage Crash - A motor vehicle traffic crash involving property damage and no injury or death.

CRASH TYPE - The category that best describes the general type of collision which was the first harmful event, that is, the first occurrence of injury or damage.

DRIVER/OPERATOR - The occupant of a vehicle who is in actual physical control of a vehicle in transit or, for an out-of-control vehicle, the occupant who was in control before control was lost.

FATALITY RATE - The number of persons killed per 100 million vehicle miles traveled.

FIRE-RELATED CRASH - Combustion, explosion or burning of a unit related to a motor vehicle crash regardless of whether a collision occurs.

Incapacitating Injury (A Injury) - An injury, other than fatal, that prevents walking, driving, or performing other activities that were performed before the crash.

Nonincapacitating Injury (B Injury) - An injury, other than fatal or incapacitating, that is evident at the scene. Evidence includes known symptoms.

Possible Injury (C Injury) - Any injury that is not evident at the scene but that is claimed by the individual or suspected by the law enforcement officer.
