

# 2003 WISCONSIN TRAFFIC CRASH FACTS

Prepared by the  
Wisconsin Department  
of Transportation

## **2003 Facts and Figures**

- 836 persons were killed in Wisconsin motor vehicle traffic crashes. This is an average of two lives lost each day on Wisconsin trafficways.
- The fatality rate per 100 million miles of travel was 1.4, compared to 1.37 in 2002.
- 56,882 persons were injured in 39,413 reported injury crashes and 748 fatal crashes. 5,602, or 10%, of those injured were known at the time of the crash to have sustained incapacitating injuries.
- Of the 836 persons killed, 8% (53 pedestrians and 12 bicyclists) were not drivers or passengers of motor vehicles.
- Of the 836 persons killed, 42% died in alcohol-related crashes. 34% died in speed-related crashes and 19% died in crashes that involved both speed and alcohol.
- Of the 520 drivers who were killed and tested for alcohol concentration, 195 drivers (38%) had an alcohol concentration of .10 or above.
- Of the 53 pedestrians killed, 7 (13%) were tested with a blood alcohol concentration of .10 or above.
- 100 motorcyclists were killed, the greatest number in any one year since 1986, when 104 died.
- 75% of all motorcyclists killed in crashes (for instances in which helmet use could be determined) were not wearing helmets.
- 41% of persons killed in passenger car and light truck crashes (for instances in which safety belt use could be determined) were using safety restraints.
- 61% of all crashes occurred off the state highway and interstate systems, on county trunk and local roads.
- The total number of registered vehicles was 5,160,673, a 2.4% increase over 2002.
- The total number of licensed drivers was 3,933,924, a 2.4% increase over 2002.

### **Crashes, Not Accidents**

Traffic crashes are not accidents, but are avoidable events caused by a single variable or chain of variables. Dedicated to reducing traffic injuries and fatalities by addressing the factors that cause them, the Bureau of Transportation Safety coordinates a statewide behavioral highway safety program.

Dear Traffic Safety Advocates:

The Wisconsin Department of Transportation is pleased to provide you with a copy of the 2003 edition of the *Wisconsin Traffic Crash Facts Book*.

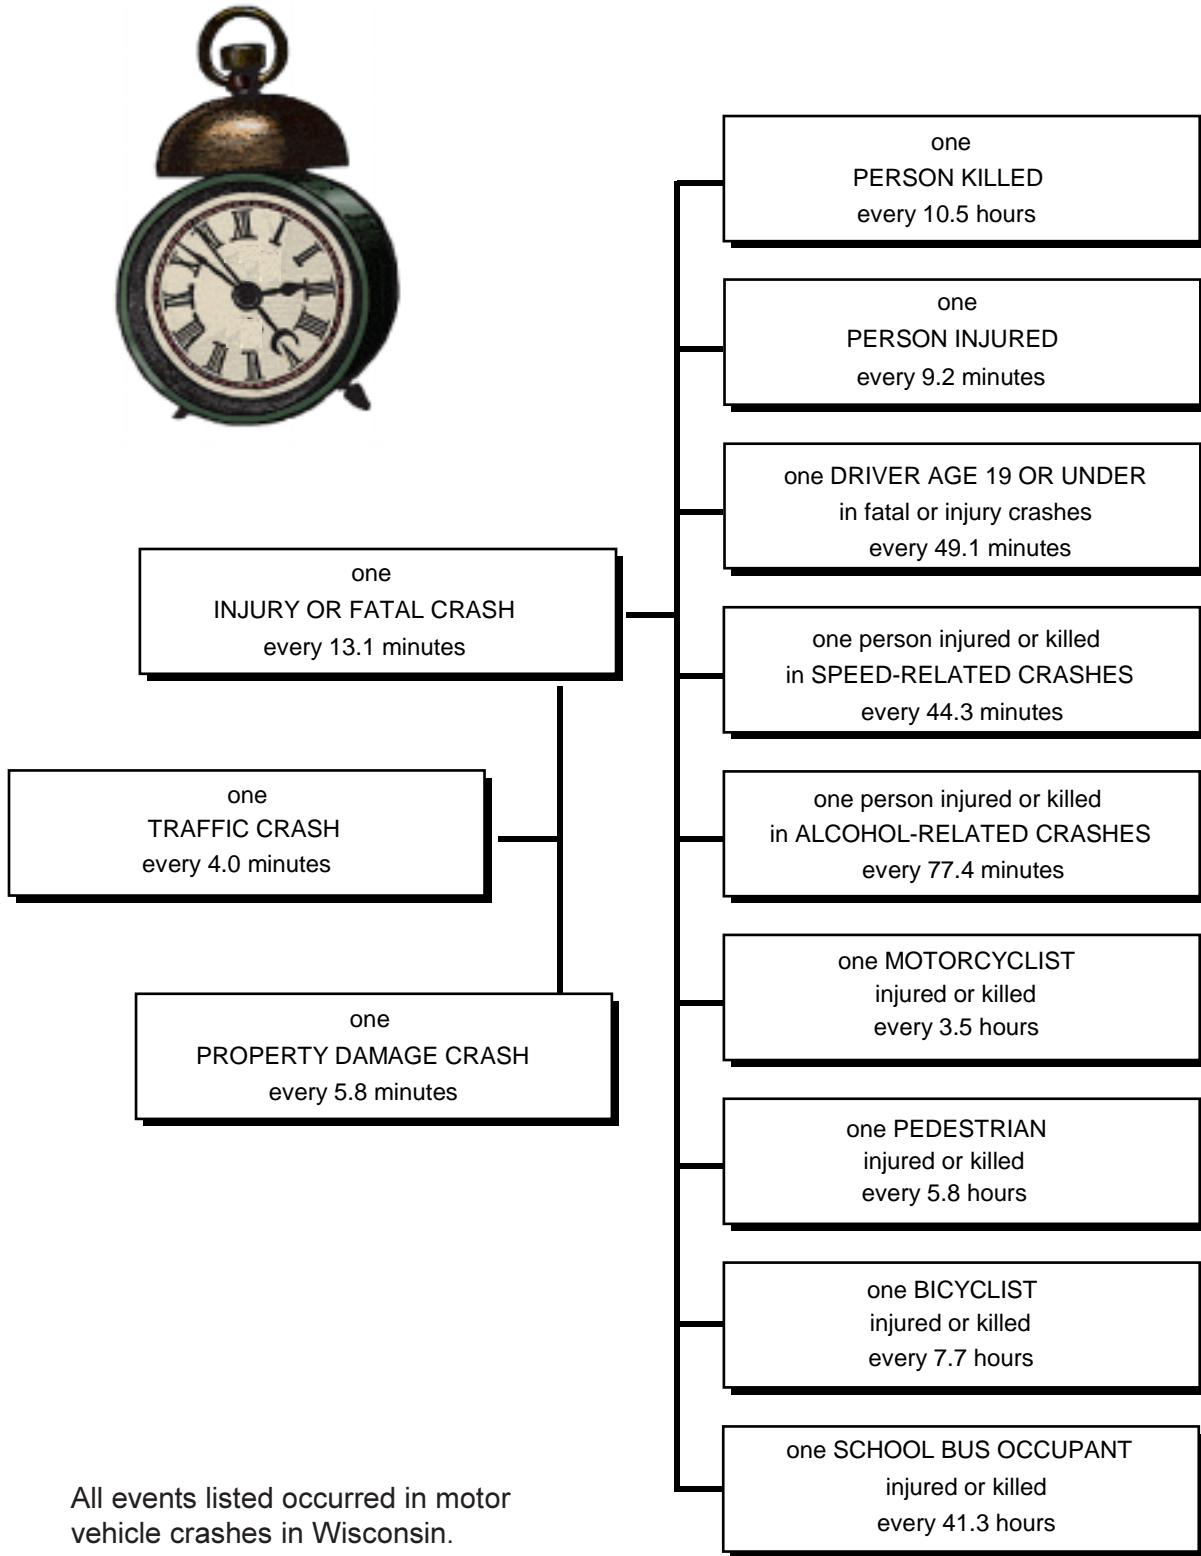

This book provides statewide information on traffic crashes, deaths and injuries. To help you identify current and emerging traffic safety issues, this information is provided in several levels of detail including: number and types of crashes, types of vehicles involved in crashes, severity of injuries, and age and gender of drivers. This information is provided as a resource for traffic safety professionals and those interested in making Wisconsin's roadways, sidewalks, and bicycle paths safe for all of us who travel them.

To view this publication online, visit [www.dot.wisconsin.gov](http://www.dot.wisconsin.gov). To obtain additional copies of the Crash Facts Book or more information about transportation safety in Wisconsin, please contact us.

Sincerely,

Major Daniel W. Lonsdorf, Director  
Bureau of Transportation Safety

**Recent Changes in Crash Reporting Threshold**

- December 20, 1979** - Property damage threshold increased from \$200 to \$400 combine damage. \$200 threshold for government-owned property.
- July 31, 1981** - Property damage threshold \$500 to "any one person's property." \$ threshold for government-owned property.
- April 19, 1988** - Property damage threshold \$500 to "any one person's property." Government-owned property changed to \$500 for government-owned vehicles, and \$200 for all other government-owned property.
- January 1, 1996** - Property damage threshold changed to \$1,000 to "any one person's property." Government-owned property changed to \$1,000 for government-owned vehicles, and remained at \$200 for all other government-owned property.

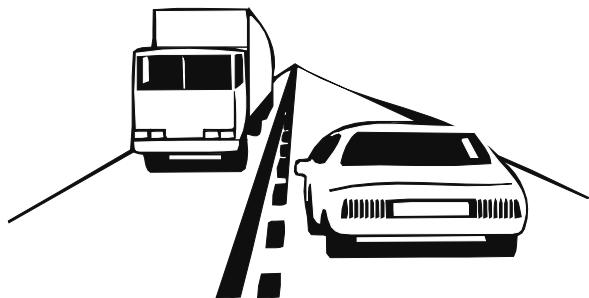

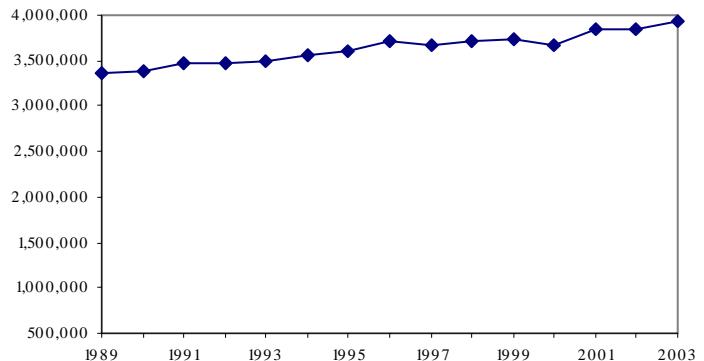

The "reporting threshold" is the minimum set of criteria that must be met before a crash is considered to be reportable. The above represent changes to the reporting threshold over recent years. See the Glossary at the end of the book for a full definition of a "reportable crash".

# The State of Traffic Crashes in Wisconsin

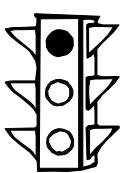

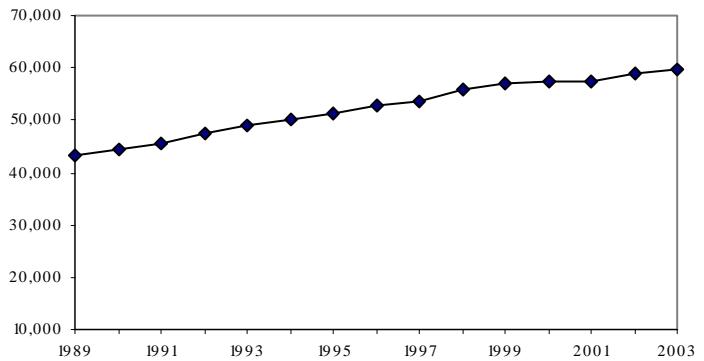

In 2003, there were 3,933,924 licensed drivers registered in Wisconsin.

## Licensed Drivers

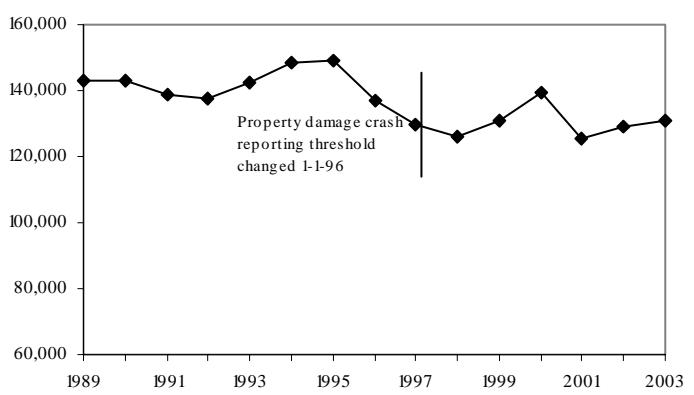

In 2003, there were 59.617 billion vehicle miles traveled in Wisconsin.

## Vehicle Miles Traveled

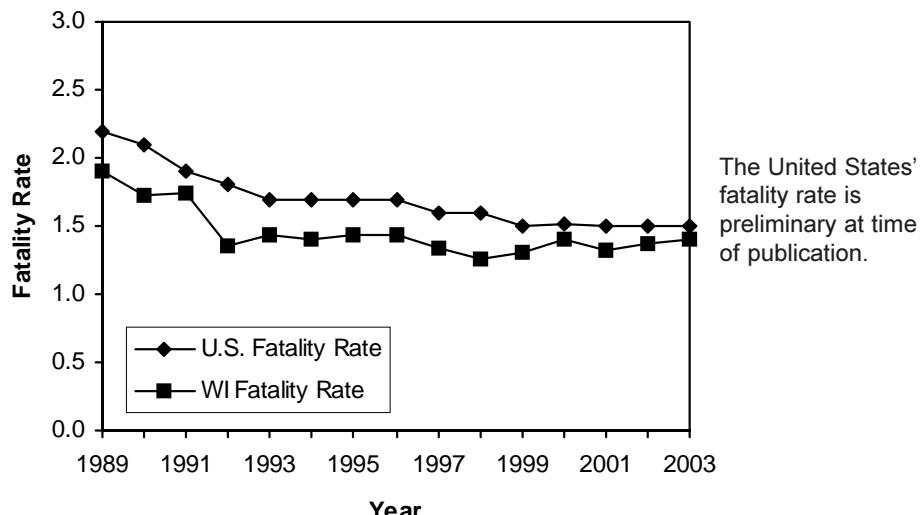

In 2003, there were 131,191 traffic crashes in Wisconsin.

## Wisconsin and U.S. Motor Vehicle Fatality Rates Fifteen Year Summary

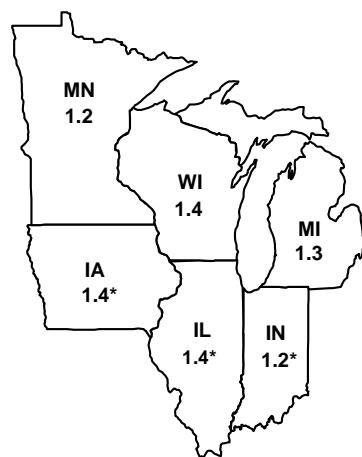

## Travel Patterns

The Department of Transportation's National Household Travel Survey (NHTS) was published at the end of calendar year 2003. The survey contacted 26,000 households and interviewed 60,000 persons about the amount and purpose of their travel, the use of different travel modes, time and miles spent traveling, and the ownership of vehicles. The survey updates the work of the 1995 Nationwide Personal Transportation Survey and aims to reveal travel-related characteristics of households and individuals in the United States, characteristics of daily trips taken in the nation, and characteristics of long-distance trips made domestically (and to other countries).

As would be expected, the 2001 NHTS data demonstrate a widespread prevalence of drivers and personal vehicles in the United States. Nationwide, about 88 percent of persons 15 years or older are reported as drivers. The mean number of drivers in U.S. households is 1.8 and, on average, those households own or have available to them 1.9 personal vehicles. Only 8 percent of households report not having a vehicle available for regular use. The owned passenger cars were, on average 8.6 years old; the average age of light trucks was 6.5 years old.

## Fatality Rates of Surrounding States

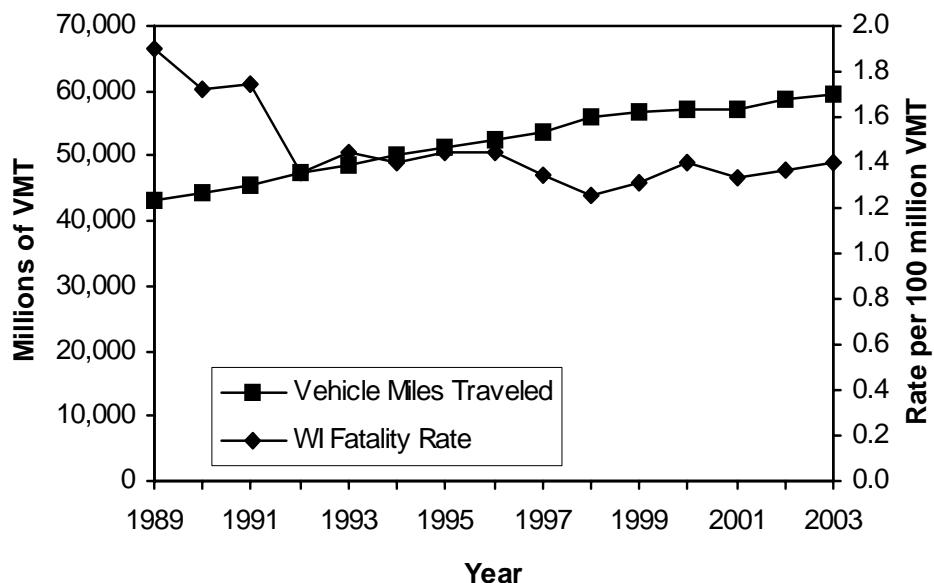

Fatality rate = deaths per 100 million miles of vehicle travel  
The Iowa and Illinois numbers are preliminary at press time; Indiana's is from CY2002.

Although this method of calculating economic loss is the same one used for the 1999, 2000, and 2001 *Wisconsin Traffic Crash Facts* books, it differs from that used in some prior *Wisconsin Traffic Crash Facts* books where a single cost figure was used for all non-fatal injuries, regardless of severity.

Rural = an unincorporated area or an incorporated area with a population under 5,000.

Urban = an incorporated area with a population of 5,000 or more.

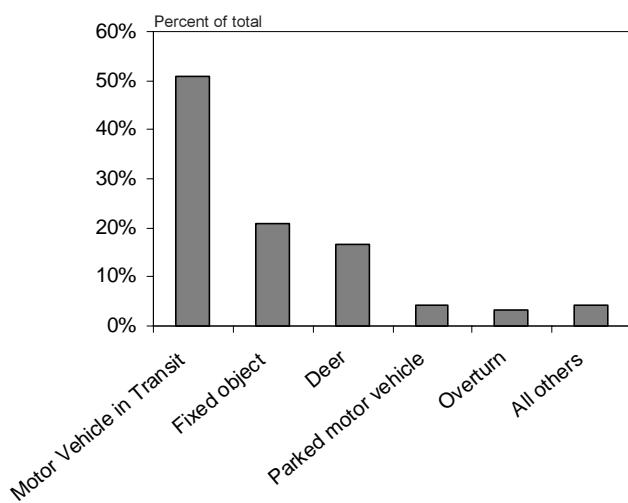

Note: Crash type is based on the first harmful event in a crash, which is defined as the first occurrence of injury or property damage.

This report counts fixed objects struck, not crashes, and it only counts fixed objects struck for which the owner type was known. *Owner Type* refers to who owned the fixed object that was struck. For example, a culvert under owner type *County/Municipal* was a struck culvert owned by the county or by a municipality.

This report is from the crash database and from the citation file and represents only the citations for the year 2003 that have been adjudicated as of the end of July, 2004. It does not consider the outcome of the adjudication. *Hazardous* citations are those issued in circumstances where the driver or vehicle condition has increased the risk of a crash. *Other hazardous* citations include offenses such as *failure to yield right of way* and *inattentive driving*. *Nonhazardous* citations include offenses such as *no or expired registration* and *no license plates*. An OWI arrest often results in two citations being issued (one for *operating under the influence* of an intoxicant and one for having a *prohibited alcohol concentration*). Mostly, this table counts only one OWI citation per arrest. Juvenile and commercial OWIs are excluded.

A traffic control should be reported for each unit in a crash; multiple traffic controls are noted in multiple unit crashes. The controls can be the same for each unit or different. If they are the same, both are listed. Less than one control would be noted if the officer didn't record a traffic control. For example, controls are not required to be noted for single unit, property damage deer crashes.

## Primary Driver Contributing Factors in Crashes Fatal Crashes

## Total Crashes

This report counts Primary Driver Possible Contributing Circumstances (PCCs) marked on the accident report form as well as citations issued by law enforcement officers. It does not address contributing factors on the part of pedestrians. It only counts one of the PCCs or citations per crash and counts some PCCs before others. Therefore, for example, the portion of primary PCCs noted as inattentive represents only PCCs for inattention that were the sole PCC given. The numbers for this report were calculated differently than in prior years and may not directly compare.

## **2002 Safety Responsibility (SR) Program Results\***

Wisconsin does not require proof of automobile insurance for driver licensure or for vehicle registration. States have found that such laws do not reduce the number of uninsured motorists, as policies are easily cancelled after leaving the motor vehicle office. Verifying continued insurance coverage has proven both difficult and costly to enforce.

However, since 1946, **The Wisconsin Safety Responsibility Law** has required all motorists involved in reportable crashes to submit evidence to the Division of Motor Vehicles of their financial ability to pay for damages they caused in the crash. A crash is reportable if an injury or death occurs, if \$200 or more damage is done to government property (except a government-owned vehicle), or if \$1,000 or more damage is done to any one person's property (including government-owned vehicles).

1997's Wisconsin Act 84 changed the name of all new Safety Responsibility and Damage Judgment case *withdrawals to suspensions*, regardless of the crash date. Future proof of insurance remains a requirement for reinstatement. Act 84 became effective on May 1, 2001.

12,119 Notices of Suspension were sent to the drivers and owners of 9,330 vehicles in 2002. In over one-third of the crashes, the drivers and owners were different persons.

3,880 (23%) responded to the Notice of Suspension by settling the claims prior to suspension.

242 Posted the required security deposit.

---

8,239 Drivers and owners failed to comply with the requirements given on the Notice of Suspension and their operating and registration privileges were suspended.

2,641 Suspended motorists complied with the Safety Responsibility requirements after the Suspension Orders were entered.

4,475 Motorists accepted the one year suspension of privileges.

1,123 Drivers and owners were still withdrawn as of April 16, 2003

---

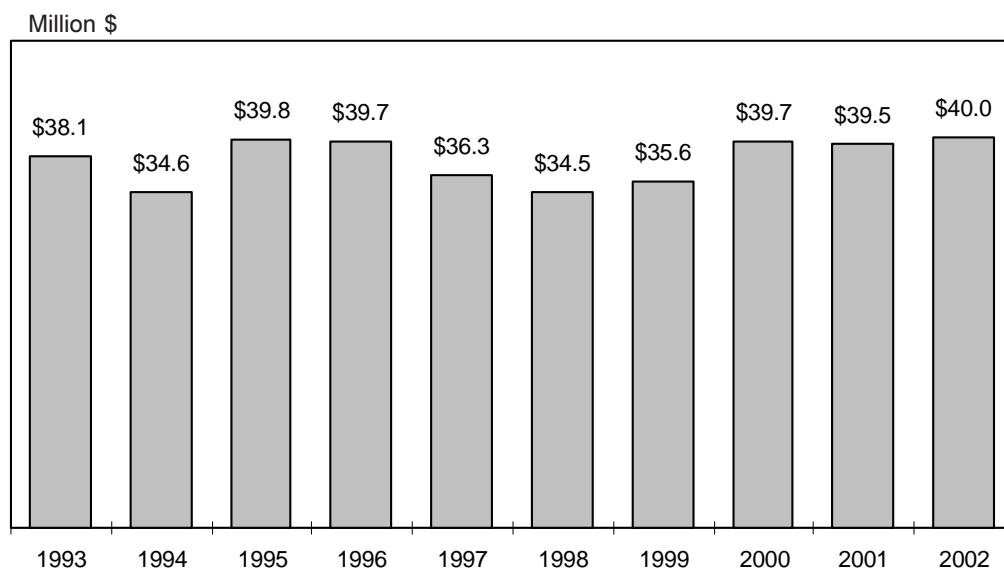

During the most recent year for which Safety Responsibility Program results are available, 2002, there were 9,609 claims (verifications of damages or injuries filed against an uninsured negligent driver and/or vehicle owner) made against 12,119 uninsured drivers and/or owners exceeding \$40 million in damages. These claim amounts include estimated court costs.

Fewer than 2% of the 208,010 vehicles involved in reportable crashes last year were uninsured, failed to pay for the damages and accepted a one year suspension of privileges. This rate does not compare unfavorably to other states.

These numbers represent crashes involving at least one large truck.

Large truck = straight (insert) truck, truck tractor (not attached, semi attached, double bottom).

Rural = an unincorporated area or an incorporated area with a population under 5,000.

Urban = an incorporated area with a population of 5,000 or more.

**Large Truck Crash Rates On Rural Interstate Highways  
Fifteen Year Summary**

Crash rate = large trucks in crashes per 100 million vehicle miles traveled. The Department of Transportation estimated that straight (insert) trucks and truck tractors (not attached, semi attached, double bottom) travelled more than 5.7 billion vehicle miles in 2003.

The numbers in this table represent the number of times a given driver PCC was cited as a possible contributing circumstance in a large truck crash. They do not represent numbers of crashes or drivers. Of the 7,964 crashes involving at least one large truck, 4,107 (52%) had driver PCCs cited for a large truck driver in the crash. Of the 89 fatal crashes, 16 (18%) had large truck driver PCCs cited. Of the 2,007 injury crashes, 1,064 (53%) had large truck driver PCCs cited.  
Large Truck = straight (insert) truck, truck tractor (not attached, semi attached, double bottom).

## Single Unit Motorcycle Crashes Primary Driver Contributing Factors

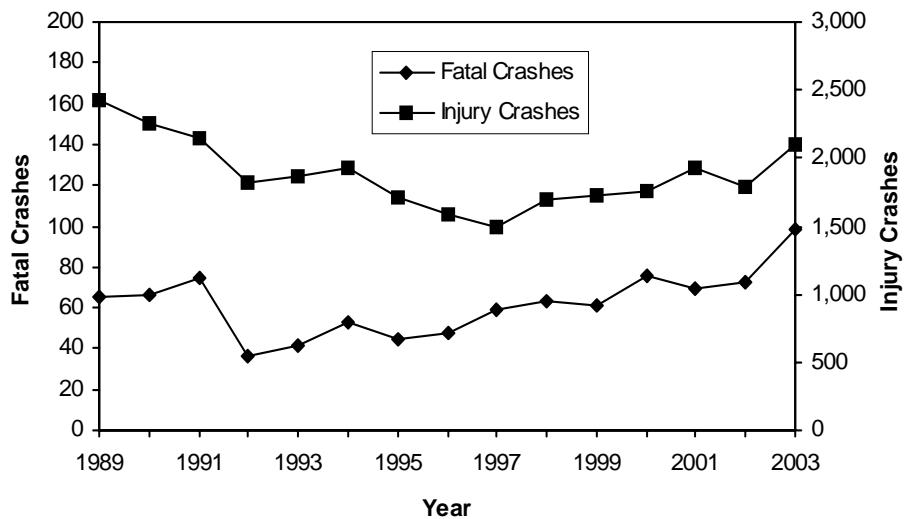

This report counts Primary Driver Possible Contributing Circumstances (PCCs) marked on the accident report form as well as citations issued by law enforcement officers. It only counts one of the PCCs or citations per crash and counts some PCCs before others. Therefore, for example, the portion of primary PCCs noted as inattention represents only PCCs for inattention that were the sole PCC given. The numbers for this report were calculated differently than in years prior to 2001 and may not directly compare.

The numbers in this table represent the number of times a given vehicle PCC was cited as a possible contributing circumstance for a vehicle in a crash. These numbers do not represent numbers of crashes. Of the 131,191 total crashes, 5,227 (4%) had vehicle PCCs cited for at least one vehicle in the crash. Of the 748 fatal crashes, 36 (5%) had vehicle PCCs cited. Of the 39,413 injury crashes, 1,566 (4%) had vehicle PCCs cited.

## **VI. SPEED- RELATED CRASHES**

# **SPEED LIMIT**

# **65**

This section details the occurrence of speed-related crashes, including:

- Age of Driver
- County and Highway Class
- Severity of Crash

## Speed-Related Crashes

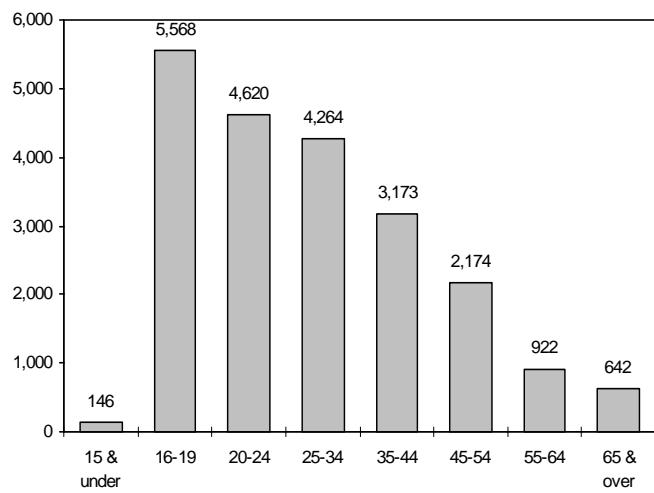

A speed-related crash is defined as a crash in which at least one driver involved in the crash received a citation for speeding or was listed on the accident report as *exceeding speed limit* or *speed too fast/condition*. In 2003, speed was listed as a contributing cause in 16% of all crashes and in 34% of all fatal crashes. Some crashes involved both speed and alcohol; those crashes are included in both the speed-related crash tables and the alcohol-related crash tables.

A crash is considered to be Speed-Related when at least one driver was listed on the crash report as exceeding speed limit or speed too fast/condition or received a citation for speeding.

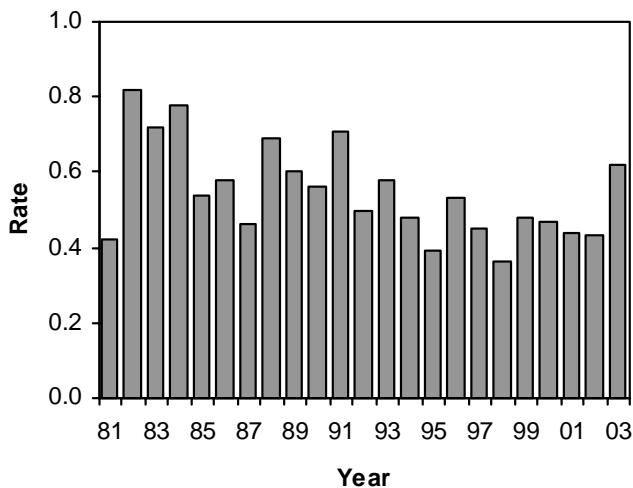

## Rural Interstate Summary

Wisconsin continues to monitor crashes on the Rural Interstate System. This is in connection with legislation that became effective on June 17, 1987, authorizing 65 mile per hour speed limits on these portions of highway.

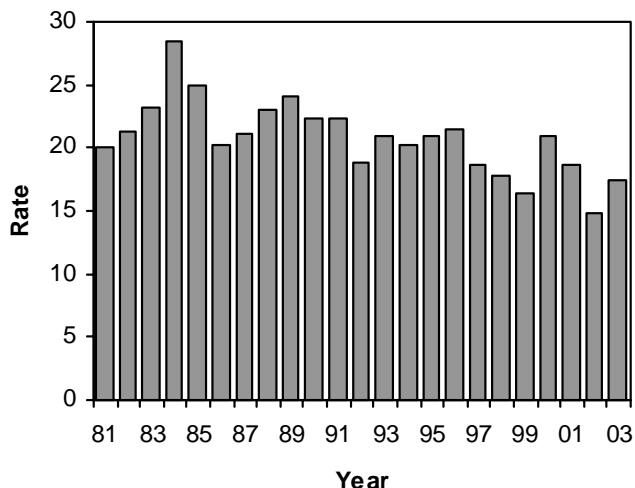

In 2003, the overall crash rate for the 516 miles of rural interstate was 74.26 compared to 62.13 in 2002. The crash rate is the number of crashes per 100 million vehicle miles traveled. Overall, vehicle miles traveled on rural interstate highways decreased by 13.5% in 2003. This is mostly due to the expansion of urban areas into areas that were previously rural; travel on roads previously classified as *rural* is now counted in *urban* mileage.

The charts below list the crash rates on rural interstate highways by crash severity.

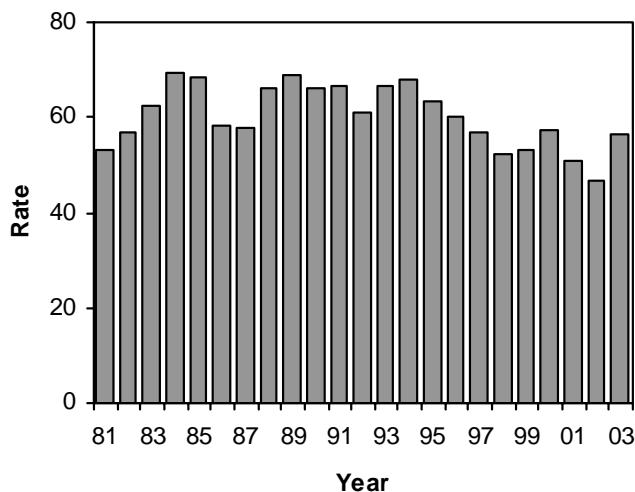

**Fatal Crash Rate**

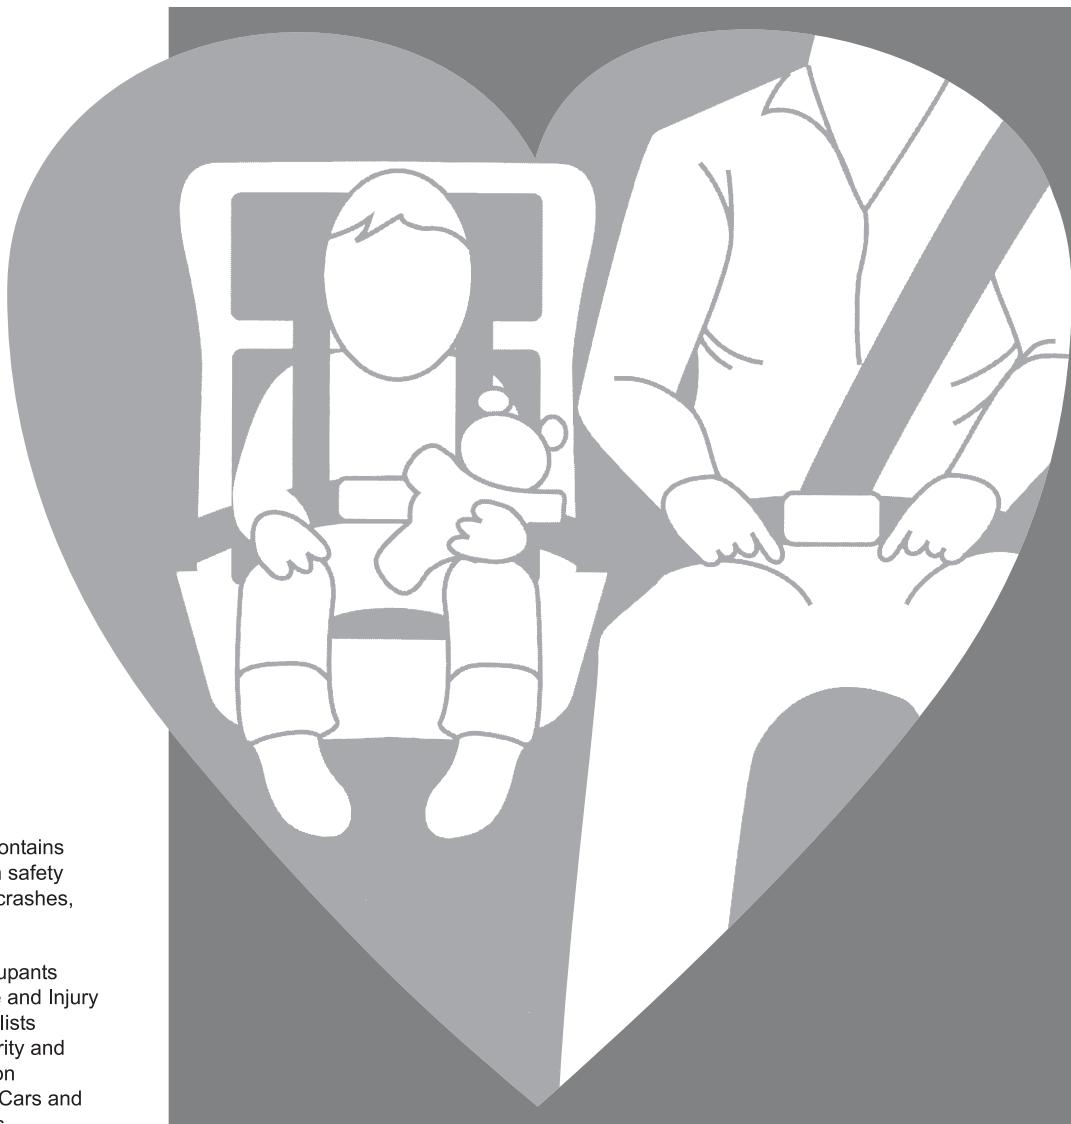

**Injury Crash Rate**

**Property Damage Crash Rate**

This portrayal is only of cyclists with known seat location. Safety equipment use is grouped here more accurately than in prior years.

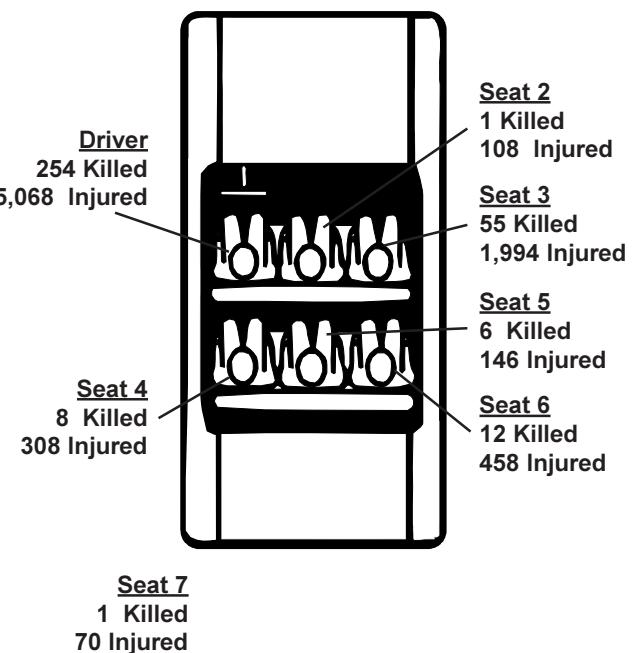

## Occupants and Injury Severity by Seating Position and Safety Equipment Use

### Passenger Cars and Light Trucks

#### With Safety Equipment

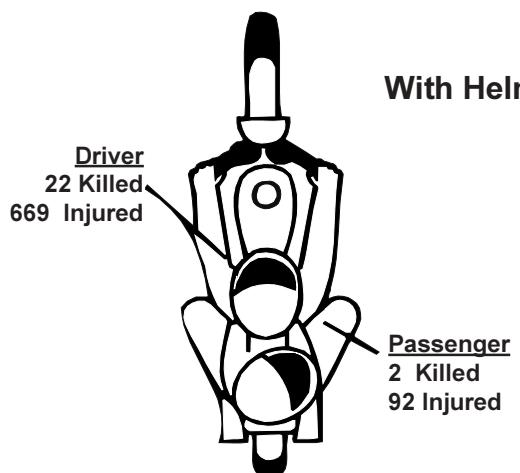

#### Without Safety Equipment

These numbers count only those occupants for whom safety equipment use and seat location were reported on the accident report form. Seat 7 includes miscellaneous seat positions such as third row seats in cars and vans. Note that use of safety equipment is often self-reported on the crash report form and may not reflect actual use.

#### Motorcycles

#### Without Helmet

These numbers include only those motorcyclists whose safety equipment use was reported on the crash report form. Use of safety equipment is often self-reported and may not reflect actual use. *Without Helmet* includes those cases where safety equipment was *Eye Protection Only*.

## Glossary of Terms

**ALCOHOL-RELATED CRASH** - Either a driver, bicyclist or pedestrian is listed on a police or coroner report as drinking alcohol before the crash.

**ALCOHOL-RELATED FATALITY** - A person who died within 30 days as a result of a traffic crash involving alcohol.

**ALCOHOL CONCENTRATION (AC) TEST** - A test to determine the level of alcohol in a person's blood-stream. In Wisconsin, the limit of .10 equals an alcohol level of 1 part per thousand.

**COLLISION CRASH** - A motor vehicle crash other than an overturning incident in which the first harmful event is a collision of a road vehicle in transport with another motor vehicle, other property, or pedestrians.

**CRASH** - An occurrence that originates or terminates on a traffic way, that involves at least one motor vehicle in transport and results in injury or death to any person, or damage to any property. This includes acts by the operators of motor vehicles that contribute to the cause of a crash regardless of physical contact and, for the purpose of ch. 344, WI Stats, (Safety Responsibility Program), includes intentional acts.

**CRASH RATE** - The number of crashes per 100 million vehicle miles traveled.

### CRASH SEVERITY

**Fatal Crash** - A motor vehicle traffic crash in which one or more persons were killed.

**Injury Crash** - A motor vehicle traffic crash involving one or more persons who were physically harmed or who complained of physical harm but were not killed.

**Property Damage Crash** - A motor vehicle traffic crash involving property damage and no injury or death.

**CRASH TYPE** - The category that best describes the general type of collision which was the first harmful event, that is, the first occurrence of injury or damage.

**DRIVER/OPERATOR** - The occupant of a vehicle who is in actual physical control of a vehicle in transit or, for an out-of-control vehicle, the occupant who was in control before control was lost.

**FATALITY RATE** - The number of persons killed per 100 million vehicle miles traveled.

**FIRE-RELATED CRASH** - Combustion, explosion or burning of a unit related to a motor vehicle crash regardless of whether a collision occurs.

**FIRST HARMFUL EVENT** - The first occurrence of injury or property damage in a motor vehicle crash.

**HAZARDOUS MATERIAL SPILLAGE** - A load spilled from a cargo-carrying vehicle that is considered dangerous or involves risk.

### INJURY SEVERITY

**Fatal Injury** (K Injury) - An injury received in a traffic crash that results in death within thirty (30) days of the crash.

**Incapacitating Injury** (A Injury) - An injury, other than fatal, that prevents walking, driving, or performing other activities that were performed before the crash.

**Nonincapacitating Injury** (B Injury) - An injury, other than fatal or incapacitating, that is evident at the scene. Evidence includes known symptoms.

**Possible Injury** (C Injury) - Any injury that is not evident at the scene but that is claimed by the individual or suspected by the law enforcement officer.

**INTERSECTION** - An area that contains a crossing or connection of two or more roadways not classified as driveway access and within the prolongation of the lateral curb lines. If no curb exists, it is the area within the extension of the lateral boundary lines of the roadway of two joined traffic ways.

**INTERSECTION-RELATED** - A crash resulting from an activity, behavior, or traffic control that affects a unit's movement in relation to an intersection, whether or not the point of origin or first harmful event occurred within the intersection.

**MOTOR VEHICLE** - A self-propelled vehicle, including trailers and semitrailers designed for use with such vehicles. This does not include farm tractors, implements of husbandry, road machinery, well drillers or snowmobiles which are classified as equipment. (See UNIT TYPE.)

**MOTOR VEHICLE IN TRANSPORT** - A motor vehicle in operation (i.e. not parked).

**MOTOR VEHICLE IN TRANSPORT IN OTHER ROADWAY** - A collision of a vehicle with another vehicle after crossing a separation area between two parallel roadways (e.g. vehicle left freeway and hit another vehicle on a frontage road).

**NON-COLLISION CRASH** - Any motor vehicle crash other than a collision crash, including explosion of any part of the motor vehicle, fire starting in the motor vehicle, overturning, immersion, vehicle struck by a flying object, etc.

**OCCUPANT** - Any person who is in or upon a vehicle, including the driver, passenger, and persons riding on the outside of the vehicle.

**PASSENGER** - Any occupant of a vehicle who is not the driver.

**POINT OF ORIGIN** - The location point where a crash begins from an activity affecting a unit's movement.

**REPORTABLE CRASH** - A crash resulting in injury or death of any person, any damage to government-owned non-vehicle property to an apparent extent of \$200 or more, or total damage to property owned by any one person to an apparent extent of \$1,000 or more. (This definition went into effect 1/1/96. See page 2.)

**ROLE** - The function of the person at the time of the crash, such as: driver, owner, passenger, injured property owner, bicyclist, or pedestrian.

**RURAL CRASH** - A crash that occurred in an unincorporated area or in an incorporated area with a population under 5,000.

**SPEED-RELATED CRASH** - A crash where at least one driver involved in the crash received a citation for speeding, or was listed on the accident report as "exceeding speed limit" or "speed too fast/conditions."

**TRAFFIC WAY** - Premises open to the public as a matter of right or custom for use of their motor vehicles whether the premises are publicly or privately owned.

**UNIT TYPE** - A way of identifying a road vehicle or a pedestrian involved in a crash. There are seven general categories of unit type:

**Auto** - Passenger car, police car, ambulance, etc.

**Truck** - Utility truck, straight truck, fire truck, truck tractor (not attached, semi attached, double bottom), motor home, etc.

**Motorcycle** - Motorcycle, moped, motor scooter, etc.

**Bus** - School bus, passenger bus, etc.

**Equipment** - Farm tractor and other self-propelled farm equipment, other working machines (e.g., forklift, grader, end loader, etc.), railroad train, snow plow, snowmobile, all-terrain vehicle, and miscellaneous.

**Bicycle** - Every non-motorized device propelled by the feet acting upon the pedals including unicycles, bicycles, tricycles, etc.

**Pedestrian** - Any person afoot (or using assistive devices). This includes someone getting on or off a vehicle.

**URBAN CRASH** - A crash that occurred within the limits of an incorporated area having a population of 5,000 or more.

**VEHICLE MILES** - The estimated total number of annual miles traveled by motor vehicles on Wisconsin highways and roadways.

**VEHICLE TYPE** - A way of further classifying a unit type by vehicle use and registration.

**WORK ZONE** - The area between the first advance warning sign and the point beyond the utility or construction work area where traffic is no longer affected.

**WORK ZONE-RELATED** - A crash that results from an activity, behavior, or traffic control related to a work zone but not necessarily within it.
