

WISCONSIN AERONAUTICAL CHART

Message from Governor Doyle

A QUALITY TRANSPORTATION SYSTEM SERVES as the foundation for economic development and public safety throughout our state. Wisconsin's network of 134 public-use airports including commercial and general aviation facilities are a vital component of that system—moving some 120,000 tons of cargo and five million passengers annually—while functioning as an all-important “gateway” for visitors entering our state.

Access to well-maintained aviation facilities plays an increasingly important role in determining where a business will locate or expand. It's no coincidence that over 85 percent of new or expanding manufacturers in Wisconsin locate in communities that are within 15 miles of public-use airports capable of handling corporate jet aircraft.

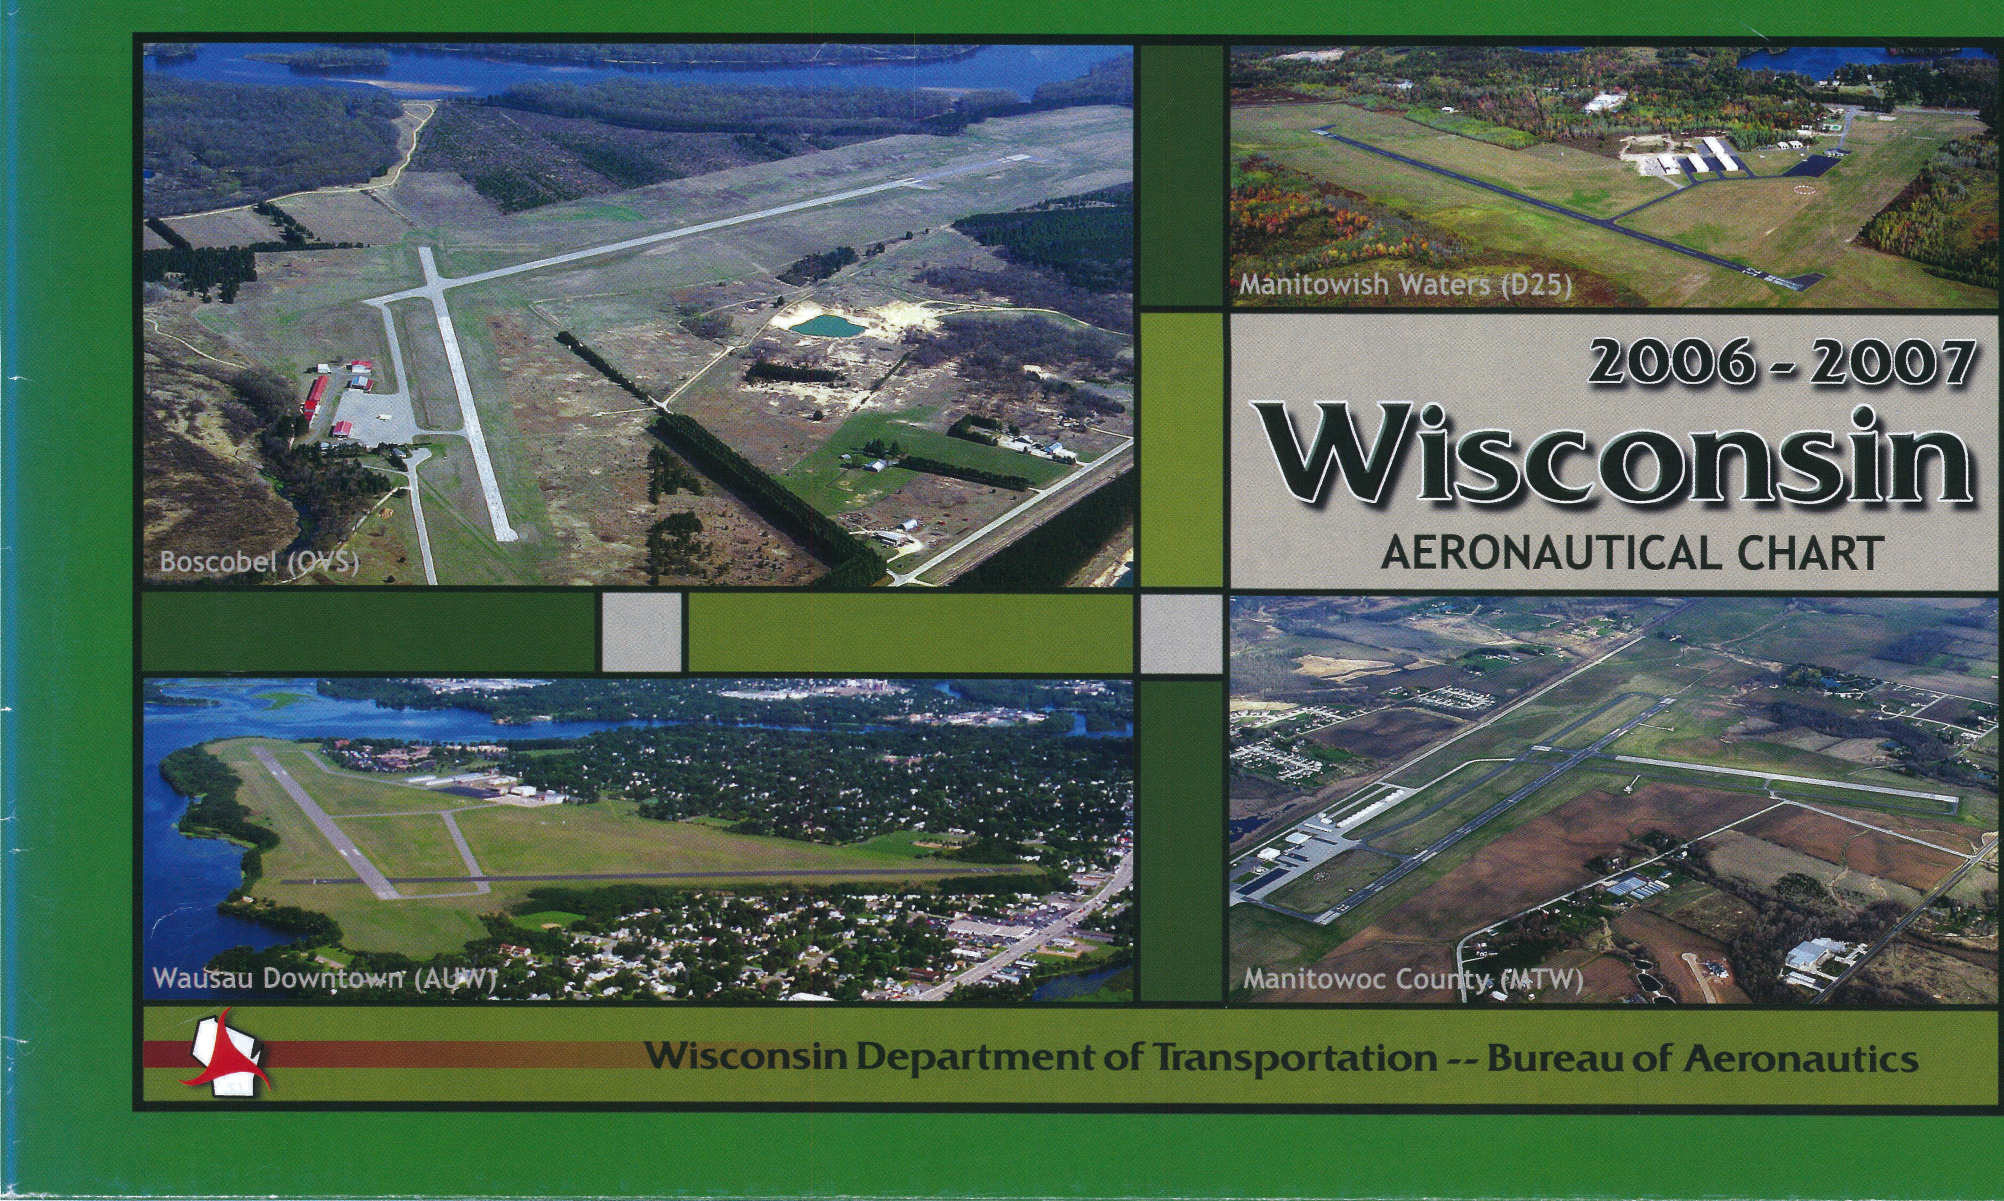

That's why the state works closely with municipalities and our many other partners to complete a variety of airport improvements —from runway construction to the installation of navigational

aids. Completing these federal, state and locally-funded projects is a key component of my “Grow Wisconsin” plan that calls for strategic investments in our transportation network to spur economic growth and enhance public safety.

Aviation's contributions to our state economy are enormous—more than \$2.8 billion annually. Wisconsin is fortunate to host several national and international events such as the annual Oshkosh Air Venture, Professional Golfers' Association and NASCAR events. Our topnotch aviation facilities play an important role in them all.

While Wisconsin is known throughout the nation for the quality of its airports, it's the hospitality of our aviation community that keeps visitors coming back. This aeronautical chart will help pilots and passengers more easily reach their destinations. Once on the ground, you'll find a team of dedicated aviation professionals ready to meet your every need. Wishing you favorable winds and smooth landings!

Jim Doyle, Governor
State of Wisconsin

Wisconsin Public Use Airports
