FLIGHT PLAN

The flight plan form shown on the opposite page is for your use in filing VFR flight plans by telephone or radio.

Use it for reference and eliminate unnecessary communications. File a flight plan for your protection. The facilities of the Search and Rescue Service, will be activated in your behalf when necessary if you have filed a flight plan.

A pilot on VFR flight within or entering an ADIZ must file a DVFR (Defense Visual Flight Rules) Flight Plan and must make a position report over a geographic fix prior to entering an ADIZ, including estimated time over the next reporting point along his flight path. If this position reporting is not practical, the pilot must report to an appropriate aeronautical facility at least 15 minutes in advance, the estimated time, position and altitude at which the aircraft will enter the ADIZ. For exceptions, check the Airman's Guide.

1. File a flight plan and arrival report with CAA Communication Station.
2. Whenever you deviate from your flight plan such as being delayed or change your destination, notify the nearest CAA Communication Station.
3. If no arrival report is received within one hour after your E.T.A. a search will be started.
4. If your final destination is not served by an Airway Communication Station, indicate in the "any other information, etc." section the method by which your arrival report will be filed. Information on the number and names of passengers, if any, should be shown in this section.

Identifiers for airports can be used in place of the full name of the airport. Cruising altitude is indicated by VFR—not the altitude you propose to fly. List intermediate stops if any are to be made.

WISCONSIN WELCOMES YOU

We in Wisconsin are deeply conscious of the importance and benefits of air travel. We are aware, too, of the constant need to make your flights to our growing communities both safe and convenient.

For these reasons, our communities are either building new airports or constantly improving their existing facilities. Our State Aeronautics Commission has developed a state-wide air-marker system for your further convenience and safety.

Whether you fly to Wisconsin on business or pleasure, we urge you to pause and share with us the beauty and relaxation of our natureland. We hope you will return as often as possible.

Sincerely,

A handwritten signature in dark ink, reading "Vernon W. Thomson". The signature is written in a cursive style with a large, sweeping "V" and a long, trailing "n".
