Wildlife Crossing Hotspots Analysis, Phase 2 FFY 2027 Request for Proposal Questions & Responses

All responses are provided in red italics.

Administrative Questions

Does the front matter (title and summary page, table of contents, list of acronyms and definitions, and list of figures and tables) count towards the total 25 page limit?

Yes, the 25 page limit includes the entire proposal.

Regarding the **Tech Transfer section at the bottom of the Summary Page:**

Complete the following if adding Technology Transfer activities to the project.

Proposed Technology Transfer Period of one month **QUESTION:** Does this additional month have to be consecutive to the original 24 month duration, e.g. the 25th month? Or can it take place later on? For example, the project's 24 months end, but 12 months later there is a conference that the Principal Investigator would like to present project findings at. Is this an acceptable tech transfer activity or does it occur too long after the project has officially ended?

Proposed Technology Transfer Amount of \$5,000. **QUESTION:** Is this \$5,000 subtracted from WisDOT's \$225,000 offered budget? Or is this an additional \$5,000 from WisDOT to connect tech transfer? Or is the awardee expected to provide this additional funding, and if so, can it be in-kind?

Proposed Contract Period: 24 months or 25 months? Or more based on the conference example given above.

Proposed Contract Amount: \$225,000 or \$230,000? – and should this tech transfer be reflected in the proposal budget worksheet (figure 4)? There is not currently a line item for this in Figure 4.

Question: If committing to tech transfer activities on the Summary Page, should the proposer's ideas for tech transfer activities be discussed in the proposal, and if so, what section? Or is this something that is discussed upon award during contracting?

The Technology Transfer section at the bottom of the Summary Page template for supplementary activities is not applicable for this Request for Proposals (RFP) and is not necessary for developing and submitting proposals in response to the RFP. An updated Summary Page template has been uploaded to the website and can be found here: <https://wisconsin.gov/documents2/research/psf-titlesummary-template.pdf>.

Wildlife Crossing Hotspots Analysis, Phase 2

No project questions.
