

April 2017 HSIS Update

Enhancements and Bug Fixes of Note:

- 1) A subscription bug that caused users to receive emails for regions or counties they had not signed up for.
- 2) InspectionDaysOpen subscription email messages now include inspection types.
- 3) InspectionDaysOpen subscription has a new option to allow you to exclude notifications for activities.
- 4) Signs, signals, and lighting inspections allow for entry of the year built, fabricator, and contractor. Inspections cannot be completed if these fields are not entered.
- 5) Fixed a bug that caused Excel files to be corrupt when database values contained certain characters.
- 6) Fixed a bug that did not allow users to create ColumnSets.
- 7) Fixed the broken sort of the last column.
- 8) Inspectors can re-open inspections they have completed within 24 hours.
- 9) New rules have been added to check for complete data before completing an Underwater Dive inspection.
