### NOTICE TO ALL CONTRACTORS:

**Proposal #17: 2290-03-73, WISC 2023098**  
**Racine - Milwaukee**  
**Bridge Over Root River B-51-0012**  
**STH 38**  
**Racine County**

### Letting of December 13, 2022

This is Addendum No. 01, which provides for the following:

#### Special Provisions:

Revised Special Provisions	
Article No.	Description
3	Prosecution and Progress

#### Schedule of Items:

Revised Bid Item Quantities					
Bid Item	Item Description	Unit	Proposal Total Prior to Addendum	Proposal Quantity Change (-)	Proposal Total After Addendum
550.0020	Pre-Boring Rock or Consolidated Materials	LF	320	360	680

Added Bid Item Quantities					
Bid Item	Item Description	Unit	Proposal Total Prior to Addendum	Quantity Added	Proposal Total After Addendum
608.0005	Storm Sewer Rock Excavation	CY	0	50	50

**Plan Sheets:**

<b>Revised Plan Sheets</b>	
<b>Plan Sheet</b>	<b>Plan Sheet Title (brief description of changes to sheet)</b>
27	Sheet revised to clarify location of Queensnake habitat and specify construction access locations to B-51-012 during the Queensnake inactive season.
99	Miscellaneous Quantity sheet revision to add undistributed quantity for Item 608.0005 Storm Sewer Rock Excavation
291	B-51-157 – Revised Pre-Boring for Rock or Consolidated Materials quantity

The responsibility for notifying potential subcontractors and suppliers of these changes remains with the prime contractor.

Sincerely,

*Mike Coleman*

Proposal Development Specialist  
Proposal Management Section

## ADDENDUM NO. 01

2290-03-73

December 2, 2022

### Special Provisions

#### 3. Prosecution and Progress

Replace paragraphs 4 and 5 under section titled **Queensnake** with the following:

The active season for the Queensnake is dependent on air/soil temperatures but will be no shorter than May 1 – September 30, could extend out to April through October depending on the weather conditions. Queensnake active periods can be found at the following location:

<https://dnr.wi.gov/topic/WildlifeHabitat/Herps.asp#regs>

Clear all vegetation with hand tools within 20 feet of the Root River in the northeast, southeast and southwest of the bridge. Vegetation removal may take place during the inactive season with no Queensnake monitor present if activities are not below the existing ground surface. Cleared trees and other vegetation within 20 feet of the Root River shall be maintained to less than 6 inches in height for the duration of construction. Maintenance of the cleared area during the active season shall occur with hand tools unless approved in advance by the WDNR Endangered Resources (ER) Transportation Liaison, Stacy Rowe at (608) 228-9796 or [stacy.rowe@wisconsin.gov](mailto:stacy.rowe@wisconsin.gov).

Caution will be exercised during inactive season grubbing and grading in Queensnake habitat. Grubbing will be performed with either hand tools (preferred) or with machine operated equipment. Grading will be performed with the smallest/lightest construction equipment feasible and as slowly as possible for a reasonable output. Construction equipment/materials and construction debris will not be stored within the Queensnake habitat areas.

#### Project Ingress and Egress (Demolition and Construction) - Inactive Season Work:

No Queensnake overwintering habitat exists within the northwest quadrant of B-51-0012. This quadrant shall be used as construction ingress and egress point for demolition and work on the west side of the Root River. There are no constraints on how this quadrant will be cleared, grubbed, and graded.

The southeast quadrant of B-51-0012 shall be used for construction access on the east side of the Root River. Grubbing and excavation in Queensnake habitat for construction access during the inactive season shall be minimized and limited to areas required to complete the bridge demolition and east abutment construction. Grubbing and excavation in Queensnake habitat shall take place under the supervision of a monitor. Tracking pads shall be used when crossing Queensnake habitat for construction access in the southeast quadrant.

Planned work and methods of access through Queensnake habitat in the inactive season shall be coordinated with the WDNR and included as part of the erosion control implementation plan (ECIP).

A Queensnake monitor (here after called as “monitor”) is an individual holding a current Wisconsin Endangered/Threatened (E/T) Species Permit or similar approval. The DNR maintains a list of monitors (individuals in Wisconsin with current Endangered/Threatened (E/T) Species Permits for herp removals) that are willing to have their names distributed. The list is not an endorsement of an individual or organization. The list can be found at the following location:

<http://wiatri.net/er/nhitraining/docs/HerpRemovalContacts.pdf>

**Schedule of Items**

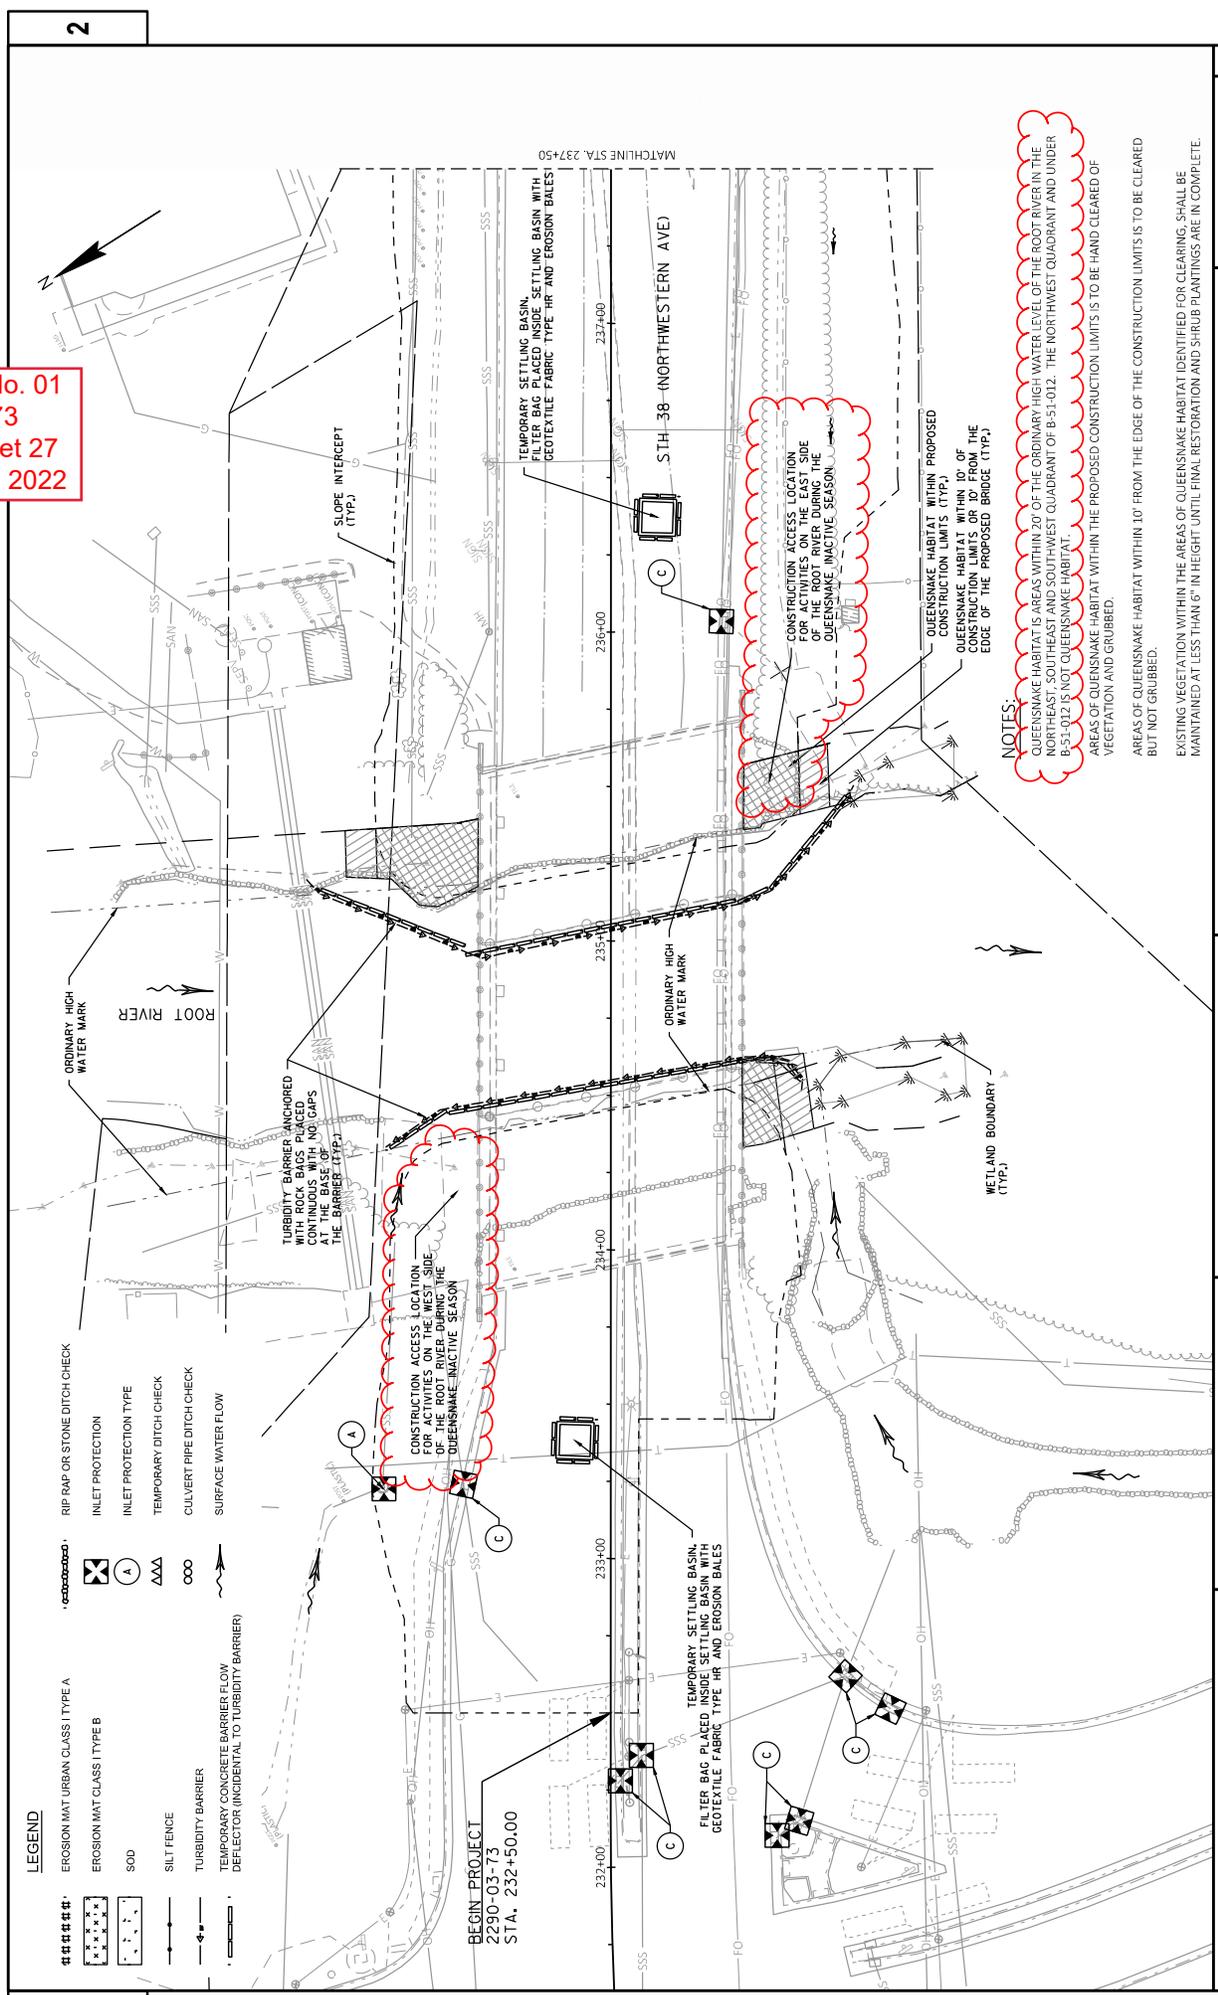

Attached, dated December 2, 2022, are the revised Schedule of Items Pages 5 and 16.

**Plan Sheets**

The following 8½ x 11-inch sheets are attached and made part of the plans for this proposal:  
Revised: 27, 99, and 291.

END OF ADDENDUM

Addendum No. 01  
 ID 2290-03-73  
 Revised Sheet 27  
 December 2, 2022

**LEGEND**

###-###-###	EROSION MAT URBAN CLASS (TYPE A)	⊠	RIP RAP OR STONE DITCH CHECK

###-###-###	TEMPORARY CONCRETE BARRIER FLOW DEFLECTOR (INCIDENTAL TO TURBIDITY BARRIER)	⊠	SURFACE WATER FLOW

**NOTES:**  
 QUEENSKAKE HABITAT IS AREAS WITHIN 20' OF THE ORDINARY HIGH WATER LEVEL OF THE ROOT RIVER IN THE NORTHEAST, SOUTHEAST AND SOUTHWEST QUADRANT OF B-51-012. THE NORTHWEST QUADRANT AND UNDER B-51-012 IS NOT QUEENSKAKE HABITAT.  
 AREAS OF QUEENSKAKE HABITAT WITHIN THE PROPOSED CONSTRUCTION LIMITS IS TO BE HAND CLEARED OF VEGETATION AND GRUBBED.  
 AREAS OF QUEENSKAKE HABITAT WITHIN 10' FROM THE EDGE OF THE CONSTRUCTION LIMITS IS TO BE CLEARED BUT NOT GRUBBED.  
 EXISTING VEGETATION WITHIN THE AREAS OF QUEENSKAKE HABITAT IDENTIFIED FOR CLEARING, SHALL BE MAINTAINED AT LESS THAN 6" IN HEIGHT UNTIL FINAL RESTORATION AND SHRUB PLANTINGS ARE IN COMPLETE.
